Exascale Computing SPPEXA of the German Research Foundation DFG presented at the SPPEXA Symposium in Dresden during October 21-23 2019. In that respect it both represents a continuation of Vol 113 in Springer's series Lecture Notes in Computational Science and Engineering the corresponding report of SPPEXA's first funding phase and provides an overview of SPPEXA's contributions towards exascale computing in today's supercomputer technology. The individual chapters address one or more of the research directions: 1 computational algorithms 2 system software 3 application software 4 data management and exploration 5 programming and 6 software tools. The book has an interdisciplinary appeal: scholars from computational sub-fields in computer science mathematics physics or engineering will find it of particular interest.

Research and Applications in Global Supercomputing Segall, Richard S., Cook, Jeffrey S., Zhang, Qingyu, 2015-01-31. Rapidly generating and processing large amounts of data: supercomputers are currently at the leading edge of computing technologies. Supercomputers are employed in many different fields, establishing them as an integral part of the computational sciences. *Research and Applications in Global Supercomputing* investigates current and emerging research in the field as well as the application of this technology to a variety of areas. Highlighting a broad range of concepts, this publication is a comprehensive reference source for professionals, researchers, students and practitioners interested in the various topics pertaining to supercomputing and how this technology can be applied to solve problems in a multitude of disciplines.
