Owain's Own John H. Corns, 2007-05-17 The town of Charleston lay across the river on the north bank of the Kanawha to the east of the bridge site and the Elk It was not much of a town at least not compared with Staunton or Winchester but Charleston was a much newer town He had never lived here he had no reason even to be here until the war Now he wished he had never seen the town wished he could turn ride away and forget it was there He pulled up the short collar of his faded gray uniform coat to cut off the wind that blew from the receding sun He looked down the river She and the children were in that direction For over the thousandth night in this war he worried if they were safe if they were afraid He shivered against the March cold and wished he could be with them Wished they could all

Gravity's Shadow Harry Collins,2010-08-15 According to the theory of relativity we are constantly bathed in gravitational radiation When stars explode or collide a portion of their mass becomes energy that disturbs the very fabric of the space time continuum like ripples in a pond But proving the existence of these waves has been difficult the cosmic shudders are so weak that only the most sensitive instruments can be expected to observe them directly Fifteen times during the last thirty years scientists have claimed to have detected gravitational waves but so far none of those claims have survived the scrutiny of the scientific community Gravity's Shadow chronicles the forty year effort to detect gravitational waves while exploring the meaning of scientific knowledge and the nature of expertise Gravitational wave detection involves recording the collisions explosions and trembling of stars and black holes by evaluating the smallest changes ever measured Because gravitational waves are so faint their detection will come not in an exuberant moment of discovery but through a chain of inference for forty years scientists have debated whether there is anything to detect and whether it has yet been detected Sociologist Harry Collins has been tracking the progress of this research since 1972 interviewing key scientists and delineating the social process of the science of gravitational waves Engagingly written and authoritatively comprehensive Gravity's Shadow explores the people institutions and government organizations involved in the detection of gravitational waves This sociological history will prove essential not only to sociologists and historians of science but to scientists themselves

Parliament,1904 **The Viaduct Murder** Ronald A. Knox,2024-12-02T16:26:54Z As the fog and rain clear one Tuesday afternoon in October four members of

a village golf club decide to fit in a match before evening sets in One of them slices his drive off the third tee Following his ball to the foot of the neighboring railway viaduct he stumbles upon a body The police soon arrive but they seem to ignore some odd circumstances noticed by the friends and the four decide to investigate themselves Ronald A Knox was something of a polymath who as a boy was fascinated by Sherlock Holmes He was so interested in mysteries that he wrote and promulgated the Ten Commandments for detective fiction in *The Viaduct Murder* the first of his own whodunits he puts these principles into practice Knox was careful to lay the facts before his readers in good faith But as one of the golfers comments early in this mystery Everything tells a story if you are careful not to theorize beyond your data The difficulty in following this maxim leads to a challenging puzzle that holds the reader till the very end This book is part of the Standard Ebooks project which produces free public domain ebooks Tramway and Railway World ,1905 **Parliamentary Papers** Great Britain.
