Looking And Listening Conversations Between Modern Art And Music:

Looking and Listening Brenda Lynne Leach, 2015 Looking and Listening Conversations between Modern Art and Music invites the art and music lover to place these two realms of creative endeavor into an open dialog. Although the worlds of music and visual art often seem to take separate paths, they are usually parallel. Conductor and art connoisseur Brenda Leach takes unique pairings of well known visual art works and musical compositions from the twentieth century to identify the shared sources of inspiration as well as similarities in theme, style, and technique to explore the historical and cultural influences on the great artists and composers in the twentieth century. Looking and Listening asks and answers: What does jazz have in common with paintings by Stuart Davis and Piet Mondrian? How did Gershwin's *Rhapsody in Blue* affect the work of artist Arthur Dove? How did painter Georgia O'Keeffe and composer Aaron Copland capture the spirit of a youthful America entering the twentieth century? What did Kandinsky and Schoenberg share in their artistic visions? Leach takes readers on a whirlwind tour of the lives of these artists, surveying many of the key movements in the twentieth century by comparing representative works from the modern masters of the visual arts and music. Leach's refreshing and innovative approach will interest those passionate about twentieth century art and music and is ideal for any student or instructor, museum docent, or music programmer seeking to draw the lines of connection between these two art forms. The Routledge Research Companion to Modernism in Music Björn Heile,Charles Wilson,2018-10-29 Modernism in music still arouses passions and is riven by controversies Taking root in the early decades of the twentieth century it achieved ideological dominance for almost three decades following the Second World War before becoming the object of widespread critique in the last two decades of the century both from critics and composers of a postmodern persuasion and from prominent scholars associated with the new musicology Yet these critiques have failed to dampen its ongoing resilience The picture of modernism has considerably broadened and diversified and has remained a pivotal focus of debate well into the twenty first century This Research Companion does not seek to limit what musical modernism might be At the same time it

resists any dilution of the term that would see its indiscriminate application to practically any and all music of a certain period In addition to addressing issues already well established in modernist studies such as aesthetics history institutions place diaspora cosmopolitanism production and performance communication technologies and the interface with postmodernism this volume also explores topics that are less established among them modernism and affect modernism and comedy modernism versus the contemporary and the crucial distinction between modernism in popular culture and a popular modernism a modernism of the people In doing so this text seeks to define modernism in music by probing its margins as much as by restating its supposed essence

Olivier Messiaen's Opera, Saint François d'Assise Vincent Perez Benitez, 2019-07-25 In this comprehensive study of Olivier Messiaen's magnum opus Saint François d'Assise Vincent Perez Benitez examines the opera from both theological and musical analytical perspectives to ask how Messiaen expresses his Catholic theology through his work Benitez combines a close reading of the opera score with accounts from Messiaen's associates studies of Messiaen's birdsong notebooks and other primary documents and an examination of the religious musical poetic and visual arts literature with which the composer was familiar to explore how the opera's harmonic language and sound color relationships motivate its musical meaning and expression Through his analysis of these diverse sources and

comparisons of Saint François d'Assise with other works such as Berg's *Wozzeck* and Wagner's *Parsifal* Benitez places Messiaen's compositional practice within larger musical perspectives and historical contexts **Monthly musical record**, 1886 **Sound in the Ecstatic-Materialist Perspective on Experimental Music** Riccardo D. Wanke, 2021-08-09 What does a one hour contemporary orchestral piece by Georg Friedrich Haas have in common with a series of glitch noise electronic tracks by Pan Sonic This book proposes that despite their differences they share a particular understanding of sound that is found across several quite distinct genres of contemporary art music the ecstatic materialist perspective Sound in the ecstatic materialist perspective is considered as a material mass or element unfolding in time encountered by a listener for whom the experience of that sound exceeds the purely sonic without becoming entirely divorced from its materiality It is material by virtue of the focus on the texture consistency and density of sound it is ecstatic in the etymological sense that is to say that the experience of this sound involves an instability an inclination to depart from material appearance an ephemeral and transitory impulse in the very perception of sound to something beyond but still related to it By examining musical pieces from spectralism to electroacoustic domains from minimalism to glitch electronica and dubstep this book identifies the key intrinsic characteristics of this musical perspective To fully account for this perspective on sonic experience listener feedback and interviews with composers and performers are also incorporated Sound in the ecstatic materialist perspective is the common territory where composers sound artists performers and listeners converge Dwight's Journal of Music John Sullivan Dwight, 1861 Dialogue and Decolonization Monika Kirloskar-Steinbach, 2023-11-16 By bringing together philosophers whose work on political philosophy intellectual history and world philosophies pushes the boundaries of conventional scholarship this collaborative collection opens up space in political philosophy for new approaches Garrick Cooper Sudipta Kaviraj Charles W Mills and Sor-hoon Tan respond to the challenges James Tully raises for comparative political thought Arranged around Tully's opening chapter they demonstrate the value of critical dialogue and point to the different attempts cultures make to understand their experiences Through the use of methods from various disciplines and cultural contexts each interlocutor exemplifies the transformative power of genuine democratic dialogue across philosophical traditions Together they call for a radical reorientation of conceptual and intellectual readings from intellectual history including the Afro-modern political tradition Indigenous philosophies and the lived experiences of societies in Asia This is an urgent methodological provocation for anyone interested in the ethical conceptual and political challenges of political thought today Theories and Documents of Contemporary Art Kristine Stiles, Peter Selz, 2012-09-25 An essential text in the field of contemporary art history it has now been updated to represent 30 countries and over 100 new artists The internationalism evident in this revised edition reflects the growing interest in contemporary art throughout the world from the U S and Europe to the Middle East Asia Africa Latin America and Australia
