Mack Body Builder Manual:

Commercial Carrier Journal, 2000 *The paradox of body, building and motion in seventeenth-century England*
Kimberley Skelton, 2015-05-01 This book examines how seventeenth century English architectural theorists and designers rethought the domestic built environment in terms of mobility as motion became a dominant mode of articulating the world across discourses encompassing philosophy political theory poetry and geography From mid century the house and estate that had evoked staccato rhythms became triggers for mental and physical motion evoking travel beyond England's shores displaying vistas and showcasing changeable wall surfaces Simultaneously philosophers and other authors argued for the first time that paradoxically the blur of motion immobilised an inherently restless viewer into social predictability and so stability Alternately feared and praised early in the century for its unsettling unpredictability motion became the most certain way of comprehending social interactions language time and the buildings that filtered human experience At the heart of this narrative is the malleable sensory viewer tacitly assumed in early modern architectural theory and history yet whose inescapable responsiveness to surrounding stimuli guaranteed a dependable world from the seventeenth century
