Organizational Routines Jennifer A. Howard-Grenville, Claus Rerup, Ann Langley (Professor), Haridimos Tsoukas, 2016 Over the past 15 years organizational routines have been increasingly investigated from a process perspective to challenge the idea that routines are stable entities that are mindlessly enacted A process perspective explores how routines are performed by specific people in specific settings It shows how action improvisation and novelty are part of routine performances It also departs from a view of routines as black boxes that transform inputs into organizational outputs and places attention on the actual actions and patterns that comprise routines Routines are both effortful accomplishments in that it takes effort to perform sustain or change them and emergent accomplishments because sometimes the effort to perform routines leads to unforeseen change While a process perspective has enabled scholars to open up the black box of routines and explore their actions and patterns in fine grained dynamic ways there is much more work to be done Chapters in this volume make considerable progress through the three main themes expressed across these chapters These are Zooming out to understand routines in larger contexts Zooming in to reveal actor dispositions and skill and Innovation creativity and routines in ambiguous contexts *Explanation to Accompany Sheets 1* - Ireland.
