Work, Change and Workers Stephen Billett,2006-06-22 This book aims to provide a fresh account of the changing nature of work and how workers are changing as result of the requirements of contemporary working life It also identifies implications for preparing individuals for work and then maintaining their skills throughout working life It does this by examining the relations between the changing requirements for working life and how individuals engage in work through an analysis that engages a range of disciplinary perspectives These include the psychological sociological philosophical and anthropological literatures as they relate to work and empirical research that represents both the perspectives of work and work practice as social institutions and as a vocation that individuals exercise with intentionality and agency This body of work is also used to identify implications for vocational education professional development and on going learning throughout working life This book is the product of a now long term project to understand contemporary working life and its implications for learning throughout working life Along the way it has benefited from a range of contributions It commenced with research from the early to the late 1990s that sought to understand how people learn through their work The Australian Research Council state government funding private enterprise sponsorships and the National Research and Evaluation

Committee of the Australian National Training Authority supported these investigations as did the many workplaces and workers who contributed time insights and sometimes patience

Women and Reform in a New England Community, 1815-1860 Carolyn J. Lawes, 2021-10-21 Interpretations of women in the antebellum period have long dwelt upon the notion of public versus private gender spheres As part of the ongoing reevaluation of the prehistory of the women's movement Carolyn Lawes challenges this paradigm and the primacy of class motivation She studies the women of antebellum Worcester Massachusetts discovering that whatever their economic background women there publicly worked to remake and improve their community in their own image Lawes analyzes the organized social activism of the mostly middle class urban white women of Worcester and finds that they were at the center of community life and leadership Drawing on rich local history collections Lawes weaves together information from city and state documents court cases medical records church collections newspapers and diaries and letters to create a portrait of a group of women for whom constant personal and social change was the norm Throughout *Women and Reform in a New England Community* conventional women make seemingly unconventional choices A wealthy Worcester matron helped spark a women led rebellion against ministerial authority in the town's orthodox Calvinist church Similarly a close look at the town's sewing circles reveals that they were vehicles for political exchange as well as social gatherings that included men but intentionally restricted them to a subordinate role By the middle of the nineteenth century the women of Worcester had taken up explicitly political and social causes such as an orphan asylum they founded funded and directed Lawes argues that economic and personal instability rather than a desire for social control motivated women even relatively privileged ones into social activism She concludes that the local activism of the women of Worcester stimulated and was stimulated by their interest in the first two national women's rights conventions held in Worcester in 1850 and 1851 Far from being marginalized from the vital economic social and political issues of their day the women of this antebellum New England community insisted upon being active and ongoing participants in the debates and decisions of their society and nation

International Perspectives on Competence in the Workplace Christine R. Velde, 2009-10-08 As the world's economy develops into a more dynamic fast moving and unpredictable entity it is crucial that the workers who create wealth have the ability to assess and respond to new and unforeseen challenges In other words the future will require a more competent workforce What though does this mean in practice In this the fully revised second edition of Christine Velde's book a variety of researchers from around the world provide a truly international perspective on the issue They help to redefine the term competence Rather than responding to challenges using a pre-existing set of skills they see competence as having the ability to assess new situations and then adapt one's response accordingly particularly in collaboration with others

Providing the reader with insightful perspectives about competence in different situations and contexts the book's sections explore the concept of competence in industry and vocational education in schools and colleges in small businesses and companies and in universities The interpretation experience and teaching of competence in the workplace is boiled down to five essential components that in themselves represent an argument for a more holistic conception of competence Velde herself concludes the book by synthesizing and reflecting on the contents This book provides the reader with insightful perspectives on competence and the characteristics of learning environments in different workplace contexts Drawing on phenomenographic insights allows it to present a more enlightened view of competence at the same time as opening up an international dialogue about the meaning and interpretation of competence in the workplace Useful not only to educators and researchers this volume will also assist leaders and managers in a variety of contexts to develop more meaningful workplaces
