Students will understand the relationship between consonants and vowels in words and how they work together to form words. They will also understand the importance of the sound of the word in determining its meaning. Students will be able to identify the sound of a word and use that sound to determine its meaning.

Sight Words

Some words you know on sight. You see them so frequently, or often, you just know them. When you read them, you do not have to decode them.

the	it	you	we	not
but	get	much	any	dog

Decoding Words

Other words you do not know on sight. When you read them, you decide to decode them. To decode a word:

- link the sounds to the letters
- say the word aloud

You may find you know the word when you hear it.

Consonants

Consonants are the letters b, c, d, f, g, h, j, k, l, m, n, p, q, r, s, t, v, w, x, and y. Sometimes y also acts as a vowel. Most of the letters of the alphabet are consonants. Each consonant has its own sound. The sound is the same no matter where the letter appears in the word.
