Handbook of Decision Making Goktug Morcol, 2006-11-01 Handbook of Decision Making includes the wisdom of the long theological and philosophical traditions of human society as well as a systematic exploration of the implications of contemporary evolutionary theories. Common patterns in decision making styles are identified as well as the common variations that different contexts may generate. The text covers the multiplicity of mainstream decision making styles such as cost-benefit analysis and linear programming. It also explains alternative and emerging methods such as geographic information systems, Q methodology, and narrative policy analysis. Practical applications are discussed using decision making practices in budgeting, public administration and governance, drug trafficking, and information systems.

Comparative Management Studies Alan S. Gutterman, 2019-04-04 All managers regardless of where they work must understand certain basic concepts such as the functions, roles, and skills associated with the managerial position and the styles available to managers for use in any given situation. However, context matters, and it is essential that managers understand the role that culture plays in being effective in their positions. This book begins with a brief description of the history and evolution of management studies, continues with an overview of the scope and practice of comparative management studies, and provides examples of the research that has been done on cross-cultural transfer of management theories. In addition, the book includes materials on the search for and analysis of dimensions of management styles that can be used as a basis for creating models that can be used for comparison purposes.

Entrepreneurship in the BRICS Ndivhuho Tshikovihi, Fulufhelo Netswera, Ravinder Rena, 2024-10-14 Entrepreneurship is a tool of innovation promotion that supports sound economic environments as it stimulates economic growth and development.
