[Hyperspectral Imaging for Fine to Medium Scale Applications in Environmental Sciences](#) Michael Vohland, András Jung, 2021-05-14 The aim of the Special Issue Hyperspectral Imaging for Fine to Medium Scale Applications in Environmental Sciences was to present a selection of innovative studies using hyperspectral imaging HSI in different thematic fields This intention reflects the technical developments in the last three

decades which have brought the capacity of HSI to provide spectrally spatially and temporally detailed data favoured by e.g. hyperspectral snapshot technologies miniaturized hyperspectral sensors and hyperspectral microscopy imaging. The present book comprises a suite of papers in various fields of environmental sciences: geology, mineral exploration, digital soil mapping, mapping and characterization of vegetation and sensing of water bodies including under ice and underwater applications. In addition, there are two rather methodically/technically oriented contributions dealing with the optimized processing of UAV data and on the design and test of a multi-channel optical receiver for ground-based applications. All in all, this compilation documents that HSI is a multi-faceted research topic and will remain so in the future. **Journal of Aircraft**, 2009
