Students will understand the relationship between the sounds of words and the letters that represent those sounds. They will be able to identify the sounds of words and the letters that represent those sounds. They will be able to use this knowledge to decode words and to understand the relationship between the sounds of words and the letters that represent those sounds.

Sight Words

Some words you know on sight. You see them so frequently, or often, you just know them. When you read them, you do not have to decode them.

the	it	you	we	not
but	get	much	any	dog

Decoding Words

Other words you do not know on sight. When you read them, you decide to decode them. To decode a word:

- link the sounds to the letters
- say the word aloud

You may find you know the word when you hear it.

Consonants

Consonants are the letters b, c, d, f, g, h, j, k, l, m, n, p, q, r, s, t, v, w, x, and y. Sometimes y also tells us a consonant. Most of the letters of the alphabet are consonants.

Each consonant has its own sound. The sound is the same no matter where the letter appears in the word.
