Stewart,George W

Bohlander,Scott Snell,Monica Belcourt,Melanie Peacock,2016 **Fish Physiology: Homeostasis and Toxicology of Essential Metals** ,2011-06-28 Homeostasis and Toxicology of Essential Metals synthesizes the explosion of new information on the molecular cellular and organismal handling of metals in fish in the past 15 years These elements are no longer viewed by fish physiologists as heavy metals that kill fish by suffocation but rather as interesting moieties that enter and leave fish by specific pathways which are subject to physiological regulation The metals featured in this volume are those about which

there has been most public and scientific concern and therefore are those most widely studied by fish researchers Metals such as Cu Zn Fe Ni Co Se Mo and Cr are either proven to be or are strongly suspected to be essential in trace amounts yet are toxic in higher doses The companion volume Homeostasis and Toxicology of Non Essential Metals Volume 31B covers metals that have no known nutritive function in fish at present but which are toxic at fairly low levels such as Ag Al Cd Pb Hg As Sr and U In addition three chapters in Volumes 31A and 31B on Basic Principles Chapter 1 31A Field Studies and Ecological Integration Chapter 9 31A and Modeling the Physiology and Toxicology of Metals Chapter 9 31B act as integrative summaries and make these two volumes a vital set for readers All major essential metals of interest are covered in metal specific chapters Each metal specific chapter is written by fish physiologists toxicologists who are recognized authorities for that metal A common format is featured throughout this two volume edition

Homeostasis and Toxicology of Essential Metals Chris M. Wood, Anthony Peter Farrell, Colin J. Brauner, 2012 Homeostasis and Toxicology of Essential Metals synthesizes the explosion of new information on the molecular cellular and organismal handling of metals in fish in the past 15 years These elements are no longer viewed by fish physiologists as heavy metals that kill fish by suffocation but rather as interesting moieties that enter and leave fish by specific pathways which are subject to physiological regulation The metals featured in this volume are those about which there has been most public and scientific concern and therefore are those most widely studied by fish researchers Metals such as Cu Zn Fe Ni Co Se Mo and Cr are either proven to be or are strongly suspected to be essential in trace amounts yet are toxic in higher doses
