The Oxford Handbook of Animal Ethics Tom L. Beauchamp, (1941-2012) R.G.

Frey, 2011-03-01 Humans encounter and use animals in a stunning number of ways. The nature of these animals and the justifiability or unjustifiability of human uses of them are the subject matter of this volume. Philosophers have long been intrigued by animal minds and vegetarianism but only around the last quarter of the twentieth century did a significant philosophical literature begin to be developed on both the scientific study of animals and the ethics of human uses of animals. This literature had a primary focus on discussion of animal psychology, the moral status of animals, the nature and significance of species, and a number of practical problems. This Oxford Handbook is designed to capture the nature of the questions as they stand today and to propose solutions to many of the major problems. Several chapters in this volume explore matters that have never previously been examined by philosophers. The authors of the thirty-five chapters come from a diverse set of philosophical interests in the History of Philosophy, the Philosophy of Mind, the Philosophy of Biology, the Philosophy of Cognitive Science, the Philosophy of Language, Ethical Theory, and Practical Ethics. They explore many theoretical issues about animal minds and an array of practical concerns about animal products, farm animals, hunting, circuses, zoos, the entertainment industry, safety testing on animals, the status and moral significance of species, environmental ethics, the nature and significance of the minds of animals, and so on. They also investigate what the future may be expected to bring in the way of new scientific developments and new moral problems. This book of original essays is the most comprehensive single volume ever published on animal minds and the ethics of our use of animals. Animal Ethics in Context Clare Palmer, 2010 Animals, capacities, and moral status. Capacity-oriented accounts of animal ethics. Capacities, contexts, and relations. Wildness, domestication, and the laissez-faire intuition. Developing a new relational approach. Past harms and special obligations. Some problems and questions. Puzzling through some cases. Works Righteousness Anna L. Peterson, 2020-10-19 In Works Righteousness Anna L. Peterson examines the place of practice in contemporary ethical theory. Peterson argues that rather than assuming that pre-established moral ideas guide action, ethicists should acknowledge and explore the relationship between ideas, actions, and results. Both an analysis of alternative models in which practice plays a stronger role and an argument for taking practice more seriously in broad questions of ethics as well as in concrete case studies. Works Righteousness contends that what we do generates and alters our values just as often as expressed values motivate or guide the ways we act. Peterson here challenges prevailing philosophical and religious theories that ideas are what truly matter, underlining the value of attention to people's concrete experiences and highlighting the relevance of theoretical insights to contemporary social issues such as climate change, euthanasia, and hate speech. Through examinations of pragmatism, Marxism, and religious pacifism, all of which significantly highlight a practice-focused approach. Works Righteousness addresses the way social structures condition moral ideas and actions, the dangers of thinking about moral problems as polarized dilemmas, and the complex mutual shaping of ideas and actions. Applied Ethics Larry May, 2017-07-05 This best-selling text continues to fill an existing gap in the literature taught in applied ethics courses. As a

growing number of courses that include the perspectives of diverse cultures are being added to the university curriculum texts are needed that represent more multicultural and diverse histories and backgrounds This new edition enhances gender coverage as nearly half of the pieces are now authored by women The new edition also increases the percentage of pieces written by those who come from a non Western background It offers twelve up to date articles not found in previous editions on human rights environmental ethics poverty war and violence gender race euthanasia and abortion all of these topics are addressed from Western and non Western perspectives **Moral Philosophy Through the Ages** James Fieser,2000 Takes a middle ground between the topical and historical approaches to Western ethics This book explains the historical development of the topic under consideration and most chapters focus on a specific famous philosopher who championed a particular tradition such as Aristotle Locke or Kant and the chapters are chronologically ordered **Global Journalism Ethics** Stephen J.A. Ward,2010-03-26 An argument for a new system of ethics in journalism that will take into account its global reach and impact
