1. In which image below is the angle of refraction the greatest?

- A. Image A
- B. Image B
- C. Image C
- D. Image D

Correct Answer: D. Image D

Explanation: The angle of refraction is the angle from the light ray in medium 2 to the normal. Image D therefore shows the greatest angle of refraction, as well as the smallest change of direction in the light ray. Because the light ray is not bent very much in image D, the indexes of refraction of the two mediums must be very similar.
