### Feeling blue

You can tell how healthy these birds are by looking at their feet! Sooty noddies is a species of seabird. The birds get coloured compounds (called carotenoids) from the fish that they eat. These substances become concentrated in their feet, which makes them blue. The better their diet and the healthier they are, the bluer their feet

**Critical Perspectives into Flow Research** Janet Banfield, 2024-10-31 This book breaks down barriers between disciplines engaging with flow by speaking from geography into psychology to establish geographical foundations for this psychological phenomenon It frames and works with the multiple contradictions within the extant literature as productive rather than prohibitive thereby encouraging collaboration across discrepancies as well as across disciplines It incorporates new materials and perspectives to research on flow including aesthetic theory new materialism more than human geographies and critical development geographies to broaden the theoretical and empirical landscape of future flow scholarship It also digs more deeply into pre existing areas of interest within flow research than has been done before for example with respect to dark flow flowability and tele presence to facilitate more nuanced engagement with such terms It takes a step back from the detailed empirical work that characterizes most current flow research to pose questions as to how such divergent even contradictory findings can emerge from scholarship on a supposedly universal experience that is purportedly robustly constructed and whether this contrariness is necessarily problematic or emblematic of flow itself and therefore worthy of conceptual elaboration Finally it evokes global scale and long term critical perspectives on the future evolution of flow to counteract the presentism within existing work that emphasizes immediate gains e g performance wellbeing profit in an attempt to pre empt the worst ramifications of the progressive commodification and strategization of

flow This innovative book is of interest to scholars from a range of fields from psychology to business and human resource management leisure studies and critical human geography **Alphabetic Catalogue of the English Books in the Circulating Department of the Cleveland Public Library.
