Defining Sustainable Development for Our Common Future Iris Borowy,2013-12-04 The UN World Commission on
Environment and Development chaired by former Norwegian Prime Minister Gro Harlem Brundtland alerted the world to the
urgency of making progress toward economic development that could be sustained without depleting natural resources or
harming the environment Written by an international group of politicians civil servants and experts on the environment and
development the Brundtland Report changed sustainable development from a physical notion to one based on social
economic and environmental issues This book positions the Brundtland Commission as a key event within a longer series of
international reactions to pressing problems of global poverty and environmental degradation It shows that its report *Our
Common Future* published in 1987 covered much more than its definition of sustainable development as development that
meets the needs of the present without compromising the ability of future generations to meet their own needs for which it
became best known It also addressed a long list of issues which remain unresolved today The book explores how the work of
the Commission juggled contradictory expectations and world views which existed within the Commission and beyond and
drew on the concept of sustainable development as a way to reconcile profound differences The result was both an immense
success and disappointment Coining an irresistibly simple definition enabled the Brundtland Commission to place
sustainability firmly on the international agenda This definition gained acceptability for a potentially divisive concept but it
also diverted attention from underlying demands for fundamental political and social changes Meanwhile the central
message of the Commission the need to make inconvenient sustainability considerations a part of global politics as much as
of everyday life has been side lined The book thus assesses to what extent the Brundtland Commission represented an
immense step forward or a missed opportunity **Selected Papers from the 8th Annual Conference of Energy**

Economics and Management Leixun Yang,Xinye Zheng,Zhan-Ming Chen,2019-09-20 This collection represents successful
invited submissions from the papers presented at the 8th Annual Conference of Energy Economics and Management held in
Beijing China 22-24 September 2017 With over 500 participants the conference was co hosted by the Management Science
Department of National Natural Science Foundation of China the Chinese Society of Energy Economics and Management and

Renmin University of China on the subject area of Energy Transition of China Opportunities and Challenges The major strategies to transform the energy system of China to a sustainable model include energy economic structure adjustment resource conservation and technology innovation Accordingly the conference and its associated publications encourage research to address the major issues faced in supporting the energy transition of China Papers published in this collection cover the broad spectrum of energy economics issues including building energy efficiency industrial energy demand public policies to promote new energy technologies power system control technology emission reduction policies in energy intensive industries emission measurements of cities energy price movement and the impact of new energy vehicle

Handbook on the Economics of Philanthropy, Reciprocity and Social Enterprise Stefano Zamagni, Luigino Bruni, 2013-01-01 The recent era of economic turbulence has generated a growing enthusiasm for an increase in new and original economic insights based around the concepts of reciprocity and social enterprise This stimulating and thought provoking Handbook not only encourages and supports this growth but also emphasises and expands upon new topics and issues within the economics discourse Original contributions from key international experts acknowledge and illustrate that markets and firms can be civilizing forces when and if they are understood as expressions of cooperation and civil virtues They provide an illuminating discourse on a wide range of topics including reciprocity gifts and the civil economy which are especially relevant in times of crisis for financial capitalism The Handbook questions the current phase of the market economy that arises from a state of anthropological pessimism Such anthropological cynicism is one of the foundations of the contemporary economic system that is challenged by the contributors This highly original and interdisciplinary Handbook will provide a fascinating read for academics researchers and students across a wide range of fields including economics public sector economics public policy and social policy
