Extremes in a Changing Climate Amir AghaKouchak, David Easterling, Kuolin Hsu, Siegfried Schubert, Soroosh Sorooshian, 2012-10-24 This book provides a collection of the state of the art methodologies and approaches suggested for detecting extremes trend analysis accounting for nonstationarities and uncertainties associated with extreme value analysis in a changing climate This volume is designed so that it can be used as the primary reference on the available methodologies for analysis of climate extremes Furthermore the book addresses current hydrometeorologic global data sets and their applications for global scale analysis of extremes While the main objective is to deliver recent theoretical concepts several case studies on extreme climate conditions are provided Audience The book is suitable for teaching in graduate courses in the disciplines of Civil and Environmental Engineering Earth System Science Meteorology and Atmospheric Sciences

Science of Weather, Climate and Ocean Extremes John E. Hay, 2022-11-27 Science of Weather Climate and Ocean Extremes presents an evidence based view of the most important ways in which the build up of greenhouse gases in the atmosphere is affecting both our atmosphere and the oceans The book provides compelling reasons why concerted action is required to slow the rate at which the atmosphere and oceans are changing It not only covers longer term changes in extremes and their causes but also considers the drivers and attribution of extreme events including relevant methods and techniques Members of the Royal Meteorological Society are eligible for a 35% discount on all Developments in Weather and Climate Science series titles See the RMetS member dashboard for the discount code Provides an evidence based understanding of a significant risk to the future performance of human and natural systems Includes assessments advice and recommendations of extreme weather and climate events Features case studies from around the globe to provide further context to the research

Urban Fuel Poverty Kristian Fabbri, 2019-07-04 Urban Fuel Poverty describes key approaches to defining and alleviating fuel poverty in cities using a multidisciplinary perspective and multiple case studies It provides empirical knowledge on the levels and intensities of energy poverty in urban areas along with new theoretical perspectives in conceptualizing the multidimensionality of energy poverty with special focus given to the urban environment Chapters discuss what energy poverty is in terms of taxonomy stakeholders and affected parties addressing the role of the economy and energy bills the role of climate and city factors the role of buildings and the health and psychological impact on fuel poverty The book addresses how to measure energy poverty how to map it and how to draw conclusions based on illness and social indicators Finally it explores measures to fight fuel poverty including policy and governance actions building efficiency improvements and city planning Bridges interdisciplinary divides between policy and economy cities and buildings and health and society Addresses the physical performance of urban fuel poverty and their effect on thermal comfort and human health Provides strategies and policies to mitigate energy and fuel poverty

Climate Science for Serving Society Ghassem R. Asrar, James W. Hurrell, 2013-06-18 This volume offers a comprehensive survey and a close analysis of efforts to develop

actionable climate information in support of vital decisions for climate adaptation risk management and policy Arising from submissions and discussion at the 2011 Open Science Conference OSC of the World Climate Research Program WCRP the book addresses research and intellectual challenges which span the full range of Program activities Natural Decadal Climate Variability Vikram M. Mehta,2020-11-19 Natural decadal climate variability DCV and its interactions with anthropogenic climate change ACC are vitally important to understand to predict the future of the Earth s climate This book after familiarizing readers with the importance of understanding and predicting DCV phenomena and its distinction from ACC phenomena comprehensively explains the physics of DCV integrating paleoclimate proxy and modern instrument based data and simulations with climate models Features of this book Uniquely focuses on natural DCV its physics and its predictability Presents an integrated view of DCV phenomena based on approximately 700 peer reviewed publications cited in the book Includes research on influences of decadal variability in solar emissions on the Earth s climate with a historical perspective going back several centuries Describes progress in decadal climate predictability and prediction research with a historical perspective on weather and climate predictability research This book is an excellent resource for graduate students faculty members and other teachers and researchers and anyone who is interested in learning about a very important component of the puzzle of the changing climate This book provides a comprehensive review Highlighted throughout the book are potential links between DCV and solar variability a fascinating topic that has engaged our minds for centuries Written by an expert with more than 30 years experience this book should be an invaluable resource for students and researchers interested in how our climate will evolve over the coming decades Doug Smith Decadal Climate Prediction Leader Meteorological Office Hadley Centre UK This book is a tour de force by the author who has spent his career studying decadal climate variability He brings new insights to the vast scope of this topic providing clearly understandable descriptions of the various aspects Gerald Meehl Senior Scientist National Center for Atmospheric Research Colorado USA

Climate Change, Natural Resources and Sustainable Environmental Management Hüseyin Gökçekuş,Youssef Kassem,2022-07-20 This book is a compilation of selected papers from the Fifth International Conference on Natural Resources and Sustainable Environmental Management held in Near East University November 2021 It provides intellectual guidance and scientific evidence on the challenges of global warming and climate change based on a humanistic and critical thinking approach promoting research and education to build equality in the global community and more sustainable societies This book also addresses the current challenges of bridging the gap between government policymakers and providers of science and solutions with innovative ideas and new visions to help resolve the challenges facing us in the area of natural resources water energy and environment *Geotechnical Engineering Challenges to Meet Current and Emerging Needs of Society* Nuno Guerra,Manuel Matos Fernandes,Cristiana Ferreira,António Gomes Correia,Alexandre Pinto,Pedro Sêco Pinto,2024-09-17 Geotechnical Engineering Challenges to Meet Current and Emerging Needs of Society includes the

papers presented at the XVIII European Conference on Soil Mechanics and Geotechnical Engineering Lisbon Portugal August 26 to 30th 2024 The papers aim to contribute to a better understanding of problems and solutions of geotechnical nature as well as to a more adequate management of natural resources Case studies are included to better disseminate the success and failure of Geotechnical Engineering practice The peer reviewed articles of these proceedings address the six main topics New developments on structural design Geohazards Risk analysis and safety evaluation Current and new construction methods Environment water and energy Future city world vision With contributions from academic researchers and industry practitioners from Europe and abroad this collection of conference articles features an interesting and wide ranging combination of innovation emerging technologies and case histories and will be of interest to academics and professionals in Soil Mechanics and Geotechnical Engineering

Trends and Changes in Hydroclimatic Variables Ramesh Teegavarapu, 2018-09-14 Trends and Changes in Hydroclimatic Variables Links to Climate Variability and Change discusses the change detection and trend analysis methods used to assess hydroclimatic variables in a changing climate Changes and trends in hydroclimatic variables are assessed using state of the art methods such as non linear trend estimation including spline smoothing and local regression and handling persistence or serial auto correlation in data for assessing trends in different hydroclimatic variables e g pre whitening methods This book offers a variety of real life case studies and problem solving techniques for a field that is rapidly evolving Users will find methods to evaluate points where time series characteristics change and non homogeneity in time series In addition it covers the subject of climate variability and change in an immense level of detail including changes on precipitation streamflow and sea levels Examines statistical methods for trend analysis providing an excellent reference book for scholars scientists students and professionals Offers an exhaustive treatment of several hydroclimatic variables in one book providing readers with a comprehensive understanding of changes in hydroclimatic variables over time and space Presents case studies dealing with changes in hydroclimatic variables in different geographical regions of the world Focuses on climate variability and change including an extensive assessment of trends and their associated links to climate variability and change

Sustainability Rao Y. Surampalli, Tian C. Zhang, Manish Kumar Goyal, Satinder K. Brar, R. D. Tyagi, 2020-06-08 A comprehensive resource to sustainability and its application to the environmental industrial agricultural and food security sectors Sustainability fills a gap in the literature in order to provide an important guide to the fundamental knowledge and practical applications of sustainability in a wide variety of areas The authors noted experts who represent a number of sustainability fields bring together in one comprehensive volume the broad range of topics including basic concepts impact assessment environmental and the socio economic aspects of sustainability In addition the book covers applications of sustainability in environmental industrial agricultural and food security as well as carbon cycle and infrastructural aspects Sustainability addresses the challenges the global community is facing due to population growth depletion of non renewable resources of energy environmental degradation poverty excessive generation
