Miller,2025-04-11 Math Mammoth Grade 7 A Worktext is the student book for the first half of 7th grade mathematics studies or the first half of a pre algebra course Math Mammoth grade 7 is a pre algebra curriculum The main areas of study in Math Mammoth Grade 7 A are introduction to basic algebra concepts integers and their operations solving one step equations including with negative numbers operations with negative rational numbers solving linear equations and writing equations for word problems This is the full color version in other words the inside pages are in full color Features Math Mammoth focuses on conceptual understanding It explains the WHY so your children can understand the math not just learn HOW to do it Concepts are often explained with visual models followed by exercises using those models These visual models can take the place of manipulatives for many children however it is very easy to add corresponding manipulatives to the lessons if so desired The curriculum is mastery oriented This means it concentrates fairly long on a topic delving into its various aspects This promotes conceptual understanding as opposed to spiral curricula that often tend to jump from topic to topic too much

It requires very little teacher preparation required The curriculum has no separate teacher s manual nor is it scripted The introduction to each chapter has some notes for the teacher concerning the material in the chapter All the instruction is written directly to the student in the worktext and there also exist accompanying videos where you can see Maria herself teach the material After each chapter introduction you will find a list of Internet links and resources games quizzes animations etc that can be used for fun illustrations and further practice Please note this is the full color version of the worktext
