Equitable School Scheduling Cheryl Hibbeln, Lori Rhodes, 2024-11-05 To understand a school's values and priorities look at its schedule. When schedules do not meet the instructional needs of students, the result is a pipeline from PreK through grade 12 that leaks students an outcome disproportionately experienced by students of color and other marginalized student groups. This practical and thoughtful guide demonstrates how school and district scheduling teams can become Architects of Equity: highly effective teams who design schedules that reflect their commitment to student achievement and social emotional wellbeing. Including strategies to shift collective mindsets around scheduling, organize and support teaching teams, and ensure fiscal responsibility in scheduling. *Equitable School Scheduling* is a vital resource for secondary school leaders committed to dismantling systemic inequities inherent in school structures. Readers will learn how to self-assess site and/or district data through a deep examination of the course of study, site schedule's transcripts, and graduation cohort outcomes. Design and implement an Equitable Core: a guaranteed set of courses that all students experience as a part of a meaningful graduation. Prioritize underestimated and historically underserved students in the planning of the schedule. *Equitable School Scheduling* helps school and district administrators use scheduling as a tool to transform the leaky pipeline to graduation into a meaningful path to post-secondary success for all students. *Land Economics: Principles, Problems, and Policies in Utilizing Land Resources* Roland R. Renne, 1958

PRINCIPLES OF ECONOMICS PANDEY, MANAS, 2025-10-10 The book intends to explain the various economic principles through algebraic equations, diagrams, and arithmetic so as to make them easily comprehensible. The subject matter in the present volume is systematically organised in three parts. The First part of the book is devoted to introduction explaining nature and scope of economics, micro and macroeconomics, statics, dynamics, and equilibrium analysis. The Second part focuses on microeconomics, divided into four sub-parts viz. consumption, production, exchange, and distribution. The Third and the final part of the book deals with macroeconomics, elaborating national income, concepts, measurements, and equilibrium, multiplier and accelerator principles, macro income distributions, and inequalities, business cycles, and theories of employment. Thus, the present volume has a logical structure, right from introduction to elaboration of a complete set of micro and macroeconomic principles, which will make it more readily acceptable to the students of Economics, Commerce, Management, and all concerned professional courses.

KEY FEATURES OF THE BOOK The book covers the subject comprehensively, explaining micro and macroeconomics both in a single volume. It is systematically organised in parts and sub-parts, elucidating topics for easy grasping. Chapters provide methodical elaboration of economic principles through graphs, tables, and diagrams to enhance learning, using visuals. Necessary algebraic equations and mathematical calculations have been lucidly presented, avoiding complexity. Review questions at the end of each chapter are provided for testing readers' comprehension of the subject.
