Economics of Means-Tested Transfer Programs in the United States, Volume I Robert A. Moffitt, 2016-11-18 Few government programs in the United States are as controversial as those designed to help the poor From tax credits to medical assistance the size and structure of the American safety net is an issue of constant debate These two volumes update the earlier Means Tested Transfer Programs in the United States with a discussion of the many changes in means tested government programs and the results of new research over the past decade While some programs that experienced falling

outlays in the years prior to the previous volume have remained at low levels of expenditure many others have grown including Medicaid the Earned Income Tax Credit the Supplemental Nutrition Assistance Program and subsidized housing programs For each program the contributors describe its origins and goals summarize its history and current rules and discuss recipients characteristics and the types of benefits they receive This is an invaluable reference for researchers and policy makers that features detailed analyses of many of the most important transfer programs in the United States

Behavioural Sports Economics Hannah Josepha Rachel Altman, Morris Altman, Benno Torgler, 2021-12-19 Economists have entered into the realm of sports to provide what they believe to be more cogent explanations for sport related behaviour and to suggest ways in which incentives can improve sports outcomes But prices and income the traditional workhorses of conventional economics can only provide partial explanations and understandings Drawing on a bounded rationality approach to behavioural economics this book demonstrates the analytical insights to be gained by supplementing the conventional economics toolbox with psychological cognitive sociological and institutional factors The international cast list of contributors cover a wide range of sports topics on which a behavioural approach can reveal new insights These include preferences managerial efficiency choking doping favouritism athlete well being and spectator behaviour Throughout the book there is an emphasis on the cognitive limits to smart decision making as well as the critical role played by the decision making environment This volume demonstrates that adopting a bounded rationality approach complimented with other behaviouralist approaches helps to better explain sport related behavioural sub optimal behavioural and market failures It also provides insights that could be used to improve sports outcomes and the well being of those involved in sports and to better configure policy to enhance sports performance This groundbreaking book will be an indispensable reference to students and scholars of sports economics sports management and sports science
