Committee on Financial Services, 2007 [Governing the Fragmented Metropolis](#) Christina Rosan, 2016-12-02 Comparing metropolitan planning processes in Boston Denver and Portland Christina D Rosan examines the impact that various metropolitan governance arrangements have on regional land use decisions and challenges us to think more critically about the political arrangements necessary to govern sustainable metropolitan regions **The Hub's Metropolis** James C. O'Connell, 2013-03-22 The evolution of the Boston metropolitan area from country villages and streetcar suburbs to exurban sprawl and smart growth Boston's metropolitan landscape has been two hundred years in the making From its proto suburban village centers of 1800 to its far flung automobile centric exurbs of today Boston has been a national pacesetter for suburbanization In *The Hub's Metropolis* James O'Connell charts the evolution of Boston's suburban development The city of Boston is compact and consolidated famously the Hub Greater Boston however stretches over 1 736 square miles and ranks as the world's sixth largest metropolitan area Boston suburbs began to develop after 1820 when wealthy city dwellers built country estates that were just a short carriage ride away from their homes in the city Then as transportation became more efficient and affordable the map of the suburbs expanded The Metropolitan Park Commission's park and parkway system developed in the 1890s created a template for suburbanization that represents the country's first example of regional planning O'Connell identifies nine layers of Boston's suburban development each of which has left its imprint on the landscape traditional villages country retreats railroad suburbs streetcar suburbs the first electric streetcar boulevard Beacon Street in Brookline was designed by Frederic Law Olmsted parkway suburbs which emphasized public greenspace but also encouraged commuting by automobile mill towns with housing for workers upscale and middle class suburbs accessible by outer belt highways like Route 128 exurban McMansion dotted sprawl and smart growth Still a pacesetter Greater Boston has pioneered antisprawl initiatives that encourage compact mixed use development in existing neighborhoods near railroad and transit stations O'Connell reminds us that these nine layers of suburban infrastructure are still woven into the fabric of the metropolis Each chapter suggests sites to visit from Waltham country estates to Cambridge triple deckers [The American Suburb](#) Jon C. Teaford, 2020-09-10 *The American Suburb The Basics* is a compact readable

introduction to the origins and contemporary realities of the American suburb Teaford provides an account of contemporary American suburbia examining its rise its diversity its commercial life its government and its housing issues While offering a wide ranging yet detailed account of the dominant way of life in America today Teaford also explores current debates regarding suburbia s future Americans live in suburbia and this essential survey explains the all important world in which they live shop play and work *The Other Boston Busing Story* Susan E. Eaton,2020-10-23 METCO America s longest running voluntary school desegregation program has for 34 years bused black children from Boston s city neighborhoods to predominantly white suburban schools Sixty five METCO graduates vividly recall their own stories in this revealing book Susan E Eaton interviewed program participants who are now adults asking them to assess the benefits and hardships of crossing racial and class lines on their way to school Their answers poignantly show that this type of racial integration is not easy they struggled to negotiate both black and white worlds often feeling fully accepted in neither Even so nearly all the participants believe the long term gains outweighed the costs and would choose a similar program for their own children though not without conditions and apprehensions *Knowledge Towns* David J. Staley,Dominic D. J. Endicott,2023-03-21 The remote work revolution presents a unique opportunity for higher education institutions to reinvent themselves and become talent magnets In *Knowledge Towns* David J Staley and Dominic D J Endicott argue that the location of a college or university is a necessary piece of any region s effort to attract remote knowledge workers and accelerate economic development and creative placemaking Just as every town expects a church bank branch post office and coffeehouse Staley and Endicott write we will see a decentralized network of institutions of higher education flourish acting as cornerstones for the post pandemic rebuilding of our society and economy In calling for a college in any town they are not simply proposing placing a traditional college within a town or city but envisioning instead a particular kind of higher education institution called a knowledge enterprise In addition to providing the services of a traditional college a knowledge enterprise acts as a talent magnet attracting workers looking to move to cheaper and more attractive destinations With the post COVID 19 shift to more remote work and millions of people moving to more affordable and livable cities a place that wants to attract talent will require a thriving academic environment This represents a new opportunity for town and gown to create collaborative communities The pandemic has accelerated existing trends that put at risk the viability of many colleges and universities as well as that of many towns and cities The talent magnet strategy outlined in this book offers colleges and towns a plan of action for regeneration **Airbnb, Short-Term Rentals and the Future of Housing** Lily M. Hoffman,Barbara Schmitter Heisler,2020-11-03 How do Airbnb and short term rentals affect housing and communities Locating the origins and success of Airbnb in the conditions wrought by the 2008 financial crisis the authors bring together a diverse body of literature and construct case studies of cities in the US Australia and Germany to examine the struggles of local authorities to protect their housing and neighborhoods from the increasing professionalization and commercialization of Airbnb The book argues that

the most disruptive impact of Airbnb and short term rentals has been on housing and neighborhoods in urban centers where housing markets are stressed Despite its claims Airbnb has revealed itself as platform capitalism incentivizing speculation in residential housing At the heart of this trajectory is its business model and control over access to data In a first narrative the authors discuss how Airbnb has institutionalized short term rentals consequently removing long term rentals contributing to rising rents and changing neighborhood milieus as visitors replace long term residents In a second narrative the authors trace the transformation of short term rentals into a multibillion dollar hybrid real estate sector promoting a variety of flexible tenure models While these models provide more options for owners and investors they have the potential to undermine housing security and exacerbate housing inequality While the overall effects have been similar across countries and cities depending on housing systems local response has varied from less restrictive in Australia to increasingly restrictive in the United States and most restrictive in Germany Although Airbnb has made some concessions it has not given any city the data needed to efficiently enforce regulations making for costly externalities Written in a clear and direct style this volume will appeal to students and scholars in Urban Studies Urban Planning Housing and Tourism Studies
