*Peru's Southern Coast* Nicholas Gill, 2010 Peru is one of the most diverse and fascinating countries on the planet Of the 117 life zones on earth 84 can be found here Because of this Peru s flora and fauna is some of the most unusual on earth Scientists are only beginning to grasp just how many species exist and how many are still likely to be discovered Large areas of rainforest and mountains remain unexplored It was only in the past few decades that research began on the canopy tops the upper levels of the rainforest which have opened up a whole new world of plant and wildlife As far as history goes there is more here than anywhere else in the Americas Most have heard of the Incas and Machu Picchu but there were many large civilizations here long before the Incas the Chav n Chimu Moche Wari Nazca and Paracas Each group left their mark on the country in some way and their achievements artifacts and architecture are more impressive in many ways than that of the Incas Highlights of the Southern Coast Wine and Pisco tasting OCo Sample the world s largest Pisco producing region and some of the finest wine Peru has to offer Islas Ballestas OCo See seals frigate birds and Humboldt penguins in the poor man s Galapagos Santa Catalina Monastery OCo Walk through the secluded city within a city one of Peru s most revered Catholic landmarks Nazca Lines OCo Take a gut wrenching flight in a five seater plane for the best view of the Nazca lines The Nazca Lines 22 km 13 miles north of Nazca were made by removing the darker sun baked stones and piling them on either side of the line exposing the lighter soil Why the lines were made is still open to much debate but scientists have a fairly good idea of who made them The Paracas and Nazca peoples are believed to have created the lines between 900 BC to 600 AD It is also believed that the Huari settlers from Ayacucho made some additions in the seventh century There are literally hundreds of lines and geometric shapes that stretch for miles but the animals such as a
