Speaking through the Silence Laine A. Berman,1998-10-08 Uncovering the structures and functions of conversational narratives uttered within natural social networks Laine Berman shows how working class Javanese women discursively construct identity and meaning within the rigid constraints of an hierarchical social order She does this by identifying the silences the unsaid and by revealing both the structure and function of silence in terms of its indexical reference to local meaning It is here that the force of the Javanese language as used in everyday interaction shows itself to be an extremely potent philosophical entity as well as a means of social control Thus at least in regard to the urban poor the book boldly questions the difference between traditional definitions of Javanese elegance and oppression This study will contribute to our understanding of the social consequences of language use to the linguistic knowledge of Indonesia and Java and to such basic linguistic issues as narrative structure and function speech levels and styles and indexicality features

Persuasive Speaking Irvah Lester Winter, 1928 **1890-1981** Joseph Krauskopf, 1890 Refining Technical Writing for Success Sue Mehlich, 1997 **Lost Tongues of the Red River** John D. Phan, 2025-03-04

Among the world's languages Vietnamese provides unique insight into the cosmopolitan dynamism of premodern Asia. Modern notions of language history are often constrained by nationalist narratives focused on bolstering a particular nation's social, cultural, or political identities. A closer look at the Vietnamese language reveals a rich record of interaction and transformation that does not fit easily within modern nation-state lines or boundaries. By employing philological, textual, and comparative linguistic methodologies, John D. Phan uncovers the history of a Sinitic language rooted in the Red River Plain of northern Vietnam, which he calls Annamese Middle Chinese. The life and death of this language stimulated dramatic transformations in the speech of the region, ultimately giving rise to a new and alloyed language over the early centuries of the second millennium. Vietnamese: Drawing connections among linguistic, demographic, intellectual, and cultural realities over time. Phan traces the story of the emergence of Vietnamese within the broader context of a cosmopolitan East and Southeast Asia. *Lost Tongues of the Red River* demonstrates how language forms a surprisingly intimate record of human interaction, one with unique potential to enrich and expand our understanding of the distant past.

Refining Design for Business Michael Krypel, 2014

With a focus on the intersection of design, data, and marketing in business, Michael Krypel's *Refining Design* uses before and after screenshots to show the new level of importance design now plays in the world of business and how changing the standard design process most companies follow can add accountability for driving business and customer value. This book demonstrates how to test different design versions with real customers as well as build segmentation strategies to personalise experiences across a business. Businesses that start to function in the ways described in this book evolve not only their strategies, structures, and people's skill sets but their cultures as well as they become infused with more collaboration, creativity, and accountability. The book walks through visual business cases with real-world examples of how companies tackled business obstacles by redefining their designs and moved towards transforming their business into best-in-class optimisation organisations.
