web friction stir welding fsw is an advanced technique for joining materials in a continuous operation in fsw a cylindrical shouldered tool with a profiled probe is rotated and slowly plunged into the joint line between two pieces of sheet

what is friction stir welding fsw process and applications - Sep 15 2023

web friction stir welding offers a number of advantages over conventional arc welding processes these include as a solid state welding process fsw is a largely defect free joining method with no hot cracking porosity or solidification cracks due to the lower temperatures there is a reduction in shrinkage and distortion in the material being joined

friction stir welding twi - Mar 09 2023

web friction stir welding fsw is a solid state joining process developed at twi ltd in 1991 fsw works by using a non consumable tool which is rotated and plunged into the interface of two workpieces the tool is then moved through the interface and the frictional heat causes the material to heat and soften
