

CAMERA CONTROLS

MANUAL CONTROLS ON YOUR NIKON

Use these buttons, displays and dials when you switch to M mode

1: M mode

On most Nikon D-SLRs you'll find this on the main mode dial (on the 'professional' models) you press the Mode button and turn the rear dial to swap between modes.

2: Rear (main) command dial

You turn this to change the shutter speed. This is displayed on the top LCD panel (if your SLR has one) or the LCD on the rear.

3: Front (sub) command dial

On cameras with two command dials (D90 and up), you use the front dial to change the lens aperture setting.

4: EV compensation button

On D3000- and D5000- series cameras, you hold down this button while turning the rear dial to change the lens aperture.

5: Exposure settings

The info display on the rear LCD shows you what your current shutter speed, lens aperture and ISO settings are.

6: Exposure indicator

This helps you set the exposure using readings from the camera's built-in meter. The pointer on the display lets you see how close you are to this reading.

ON THE BUTTON

HOW TO USE THE EXPOSURE INDICATOR

Even when you're in manual mode, your Nikon D-SLR will still measure the light for you

01 Switch to manual

On this D5300 and other 'consumer' Nikons, the manual setting is on the main mode dial. On pro SLRs from the D3000s up, press and hold the 'Mode' button and turn the rear command dial.

02 Set a shutter speed

You're now in charge of the exposure settings! Turn the rear command dial and pick a shutter speed suitable for the conditions. For outdoor shots, 1/125 sec is a good starting point.

03 Adjust the aperture

Now adjust the lens aperture to get the correct exposure. On cameras with two command dials, use the front dial. On those with one, hold the EV compensation button down and turn the rear dial.

04 Interpret and adjust

Now watch the exposure indicator on the LCD. Your aim is to centre the exposure at the 'zero' point, but remember that this is just a recommended exposure – you can interpret and adjust it.

How To Use Manual Mode On Nikon D31

Dennis Thomas,2011-07-12 A guide to the Nikon D5100 camera provides information on the camera s modes and menus exposure lenses lighting live view and video and in camera editing **Wildlife Management in North Carolina** ,2014 *The New York Times Magazine* ,2011

Nikon D3100 Simon Stafford,2011 A guide to the Nikon D3100 camera describes the camera s controls exposure and focusing systems custom settings shooting and setup menus and discusses the lenses and accessories available **Dslr in Manual Mode** Joshua Rexrode,2017-08-25 If you have an interest in photography you may be wondering how you can improve and take better photographs Learning how to use manual mode on your camera is one of the best ways to start taking better photos This book will help you do just that In this book we will cover everything you need to know to take the leap out of auto mode and start using your camera to its full potential We will cover the topics of ISO shutter speed and aperture As well as how to use your cameras metering system to make sure your shot is perfectly exposed This book will also cover how to use them all together to get the shot that you want Each subject will be broken down in detail and examples will be given to help guide you into using manual mode like a pro As an avid photographer myself learning how to shoot in manual was a major turning point in the quality of my photographs There is nothing at all wrong with shooting in automatic mode but for anyone wanting to take their photography to the next level manual mode is where it s at I hope you find this book helpful and get everything you need out of it to bring your photos to life I hope you enjoy and keep on taking photographs **Dslr Manual Photography Explained!** Aaron Chase,2014-03-04 Why would I want to use the manual mode if my camera can automatically adjust these settings for me Well for the same reason that professional photographers use manual mode Control You see when you let your camera automatically choose it s exposure settings based on the information it s sensors are giving it your camera will strive to expose the image as close to what the human eye would perceive the scene However the problem with this is not only that it sometimes gets it wrong but also that the way the eye

might see a scene is many if not most times not the most beautiful interesting way to capture that scene For example if you were taking a picture of the sun at sunset your camera might automatically want to expose the image rather darkly attempting to make both sun and landscape are properly exposed Your camera does not realize that a much more interesting picture could be created if you exposed the image so that the landscape became the star of your photograph exposing it so that it being the breathtaking landscape is well lit rich and interesting Or you could use your camera s automatic setting and end up with the landscape being a too dark uninteresting blob of dirt Another reason to use your DSLR s manual setting is that of style No matter whether photography is your hobby or you are looking to become a serious photographer you will eventually develop a style that you want your photography to look like Maybe that style is a dark and moody style or maybe it is a bright and cheerful style Regardless with manual you can control how your images feel and create a distinct and beautiful style in your images Whereas if you use the automatic setting this ability is taken away from you and you will end up looking like the hundreds of thousands of other digital camera user s out there

The Eyefull's Guide to MANUAL MODE Tarun Gaddam, 2022-08-28 This book deals with Manual Mode that which gives you complete control over your camera settings As the name suggests Manual mode stands for a full manual control of Aperture and Shutter Speed In this mode you can manually set both the aperture and the shutter speed to any value you want the camera lets you fully take over the exposure controls
