Sustainable Manufacturing and Remanufacturing Management Weidong Li, Sheng Wang, 2018-06-29 This book reports on the latest research and applications in the fields of sustainable manufacturing and remanufacturing as well as process planning and optimization technologies. It introduces innovative algorithms, methodologies, industrial case studies, and applications. It focuses on two topics: sustainable manufacturing for machining technologies and remanufacturing of waste electronic equipment. Various methods are covered for each one, including macro process planning, dynamic scheduling, selective disassembly planning, and cloud-based disassembly planning. The experimental analysis provided for every method explains the benefits as well as how they are sustainable for various real-world applications. Further, a theoretical analysis and algorithm design is presented for each, accompanied by the contributors' relevant research, including step-by-step guides, application scenarios, relevant literature surveys, implementation details, and case studies and critical reviews on the relevant technologies. This book is a valuable resource for researchers in sustainable manufacturing, remanufacturing, and product lifecycle management communities, as well as practicing engineers and decision makers in industry and all those interested in sustainable product development. It is also useful reading material for postgraduates and academics wanting to conduct relevant research and a reference resource for manufacturing engineers developing innovative tools and methodologies.

Tabletops - Horizontal Interactive Displays Christian Müller-Tomfelde, 2010-06-16 The objects displayed on a table can take multiple forms In meetings it is still very often printed paper although its content was originally created on a computer The content can also be a table but now in the mathematical sense showing e g the budget of a project Then we have a table on the table Most often the computer generated contents are subject of frequent changes or dynamic in nature It is a logical consequence to avoid the detour and the inherent media break by transforming the surface of the table into a display able to show media that are active and can

be computer generated and computer controlled At the same time it is desirable to maintain the inherent features and affordances of working with the objects and the contents while sitting or standing around a table Electronic Meeting Rooms On the basis of these and other elaborate considerations we started to design in 1992 1993 an electronic meeting room in Darmstadt at GMD IPSI later Fraunhofer IPSI The setup of our custom built DOLPHIN System consisted of a traditional large rectangular wooden table with four physically integrated workstation like computers with at screens This set up was complemented by linking a large ver cal pen operated interactive display at that time the rst LiveBoard outside of Xerox PARC two of which I was able to get to Darmstadt after my stay at Xerox PARC in 1990 *Electronics Mechanic (Practical) -*
