INTRODUCTION

The concept of learning disabilities is still new in many developing countries. However, India has a history of research in this area, primarily over the last two decades. Investigators from different disciplines have been involved, such as education, psychology, paediatrics, speech and hearing, and psychiatry.

Conducting studies of learning disabilities in India is not an easy task because of its multilingual and multicultural background. At present, there are 25 states and seven Union Territories (UT). Each state/UT has its own language and each language has many dialectical forms. There are 18 standard languages, each one of which has its own orthographic system (for details of Indian writing systems see Prakash and Malatesha Joshi, 1995). In fact, the states were formed on the basis of the main regional language spoken by the majority of the people within certain geographical boundaries. Each state/UT has its own regional language (the language spoken by the majority of its people) and its official language. For example, in South India there are four main states—Karnataka, Tamil Nadu, Andhra Pradesh and Kerala. The official languages of these states are Kannada, Tamil, Telugu and Malayalam, respectively. Sometimes the spoken language and the official language are one and the same and sometimes they may be different. In India the majority of the people speak Hindi, which means that Hindi is the national language. English, too, since it is an international language, is also

Disability LD has been defined by the National Joint Committee on Learning Disabilities NJCLD as a heterogeneous group of disorders of presumed neurological origin manifested differently and to varying degrees during the life span of an individual. Research Issues in Learning Disabilities Sharon Vaughn, Candace S. Bos, 2012-12-06. In this chapter we described issues in conducting intervention research with students with learning disabilities on the secondary level. We maintained that interventions should be well grounded in theories of learning as well as characterizations of learning disabilities. Pressley Scruggs that they should first be conducted in a series of highly controlled laboratory like experiments to carefully assess the potential utility of the intervention and that if the intervention is successful in highly controlled settings it should then be evaluated in classroom applications. We maintained that research designs should evolve as the research questions become more applied and that the results of laboratory research should be used to support the findings of classroom applications. Finally we described several research designs that we have found useful in conducting classroom intervention research. There is a great deal more to conducting intervention research of course than experimental or quasi experimental design. Intervention strategies likely to be effective must be identified relevant literature must be reviewed experimental materials must be developed and cooperative schools teachers parents and students must be located. Nevertheless inadequate research designs can invalidate the best and most successful efforts in all of these areas while effective and practical research designs can do much to document the best practices and advance our knowledge of effective interventions with students with learning disabilities.

This book assembles into one volume summaries of school based intervention research that relates to those who deal on a regular basis with the growing body of students having high incidence learning disabilities and or behavior disorders special educators school psychologists and clinical child psychologists. Chapter authors begin with an overview of their topic followed by a brief section on historical perspectives before moving on to the main section a critical discussion of empirically based intervention procedures. In those instances where evidence based prescriptions can legitimately be made authors discuss best practices and the conditions e.g. classroom environment teacher expertise under which these practices are most effective. A final section deals with policy issues.
