Legal Education Caroline Strevens, Richard H. Grimes, 2014 **Legal Education** Caroline Strevens, Richard Grimes, Edward Phillips, 2016-04-22 The importance of simulation in education specifically in legal subjects is here discussed and explored within this innovative collection Demonstrating how simulation can be constructed and developed for learning teaching and assessment the text argues that simulation is a pedagogically valuable and practical tool in teaching the modern law curriculum With contributions from law teachers within the UK Australia Hong Kong South Africa and the USA the authors draw on their experiences in teaching law in the areas of clinical legal education legal process evidence criminal law family law and employment law as well as teaching law to non law students They claim that simulation as a form of experiential and problem based learning enables students to integrate the classroom experience with the real world experiences they will encounter in their professional lives This book will be of relevance not only to law teachers but university teachers generally as well as those interested in legal education and the theory of law *What is Legal Education for?* Rachel Dunn, Paul Maharg, Victoria Roper, 2022-09-30 How we interpret and understand the historical contexts of legal education has profoundly affected how we understand contemporary educational cultures and practices This book the result of a Modern Law Review seminar both celebrates and critiques the lasting impact of Peter Birks influential edited collection *Pressing Problems in the Law Volume 2 What is the Law School for* Published in 1996 his book addresses many critical issues that are hauntingly present in the 21st century amongst them the impact of globalisation technological disruption and the tension inherent in law schools as they seek to balance the competing interest of teaching research and administration Yet Birks collection misses key issues too The role of wellbeing of emotion or affect the relation of legal education to education the status of legal education in what since his volume have become the devolved jurisdictions of Northern Ireland Wales and Scotland these and others are absent from the research agenda of the book Today legal educators face new challenges We are still recovering from the effects of the Covid 19 pandemic on our universities In 1996 Birks was keen to stress the importance of comparative research within Europe Today legal researchers are dismayed at the possibility of losing valuable EU research funding when the UK leaves the EU and at the many other negative effects of Brexit on legal education The proposed Solicitors Qualifying Examination takes legal education regulation and professional learning into uncharted waters This book discusses these and related impacts on our legal educations As law schools approach an existential crossroads post Covid 19 it seems timely to revisit Birks fundamental question what are law schools for **Legal Education in the Global Context** Christopher Gane, Robin Hui Huang, 2017-05-15 This book discusses the opportunities and challenges facing legal education in the era of globalization It identifies the knowledge and skills that law students will require in order to prepare for the practice of tomorrow and explores pedagogical shifts legal education needs to make inside and outside of the classroom With contributions from leading experts on legal education from various jurisdictions across the globe the work

combines theoretical depth with practical insights Seeking to understand the changing landscape of legal education in the era of globalization the contributions find that law schools can and must adopt educational strategies that at least present students with different understandings of what studying and practicing law is meant to be about They find that law schools need to offer their students choices a vision of practice that is not driven entirely by the demands of the marketplace or the needs of major international law firms Bridging the gap between theory and practice this book makes a significant contribution to the impact of globalization on legal education and how students and law schools need to adapt for the future It will be of great interest to academics and students of comparative legal studies and legal education as well as policy makers and practitioners
