Wollack,John J. Fremer,2013-09-02 High stakes tests are the gatekeepers to many educational and professional goals As such the incentive to cheat is high This Handbook is the first to offer insights from experts within the testing community psychometricians and policymakers to identify and develop best practice guidelines for the design of test security systems for a variety of testing genres Until now this information was scattered and often resided inside testing companies As a result rather than being able to learn from each other s experiences each testing entity was left to re create their own test security wheel As a whole the book provides invaluable insight into the prevalence of cheating and best practices for designing security plans training personnel and detecting and investigating misconduct to help develop more secure testing systems and reduce the likelihood of future security breaches Actual case studies from a variety of settings bring to life how security systems really work Examples from both domestic and international programs are provided Highlights of coverage include Best practices for designing secure tests Analysis of security vulnerabilities for all genres of testing Practical cheating prevention and detection strategies Lessons learned in

**Examination of Applicant Faking Behavior** Richard L. Griffith, Mitchell H. Peterson, 2006-05-01 The faking of personality tests in a selection context has been perceived as somewhat of a nuisance variable and largely ignored or glossed over by the academic literature Instead of examining the phenomenon many researchers have ignored its existence or trivialized the impact of faking on personality measurement The present volume is a much needed timely corrective to this attitude In a wide range of chapters representing different philosophical and empirical approaches the assembled authors demonstrate the courage to tackle this important and difficult topic head on as it deserves to be The writers of these chapters identify two critical concerns with faking First if people fake their responses to personality tests the resulting scores and the inferences drawn from them might become invalid For example people who fake their responses by describing themselves as diligent and prompt might earn better conscientiousness scores and therefore be hired for jobs requiring this trait that in fact they might not perform satisfactorily Second the dishonesty of the faker might itself be a problem separate from its effect on a particular score Someone who lies on a pre employment test might also lie about the hours he or she works or how much cash is in the till at the end of the shift Worse these two problems might exacerbate each other a dishonest applicant might get higher scores on the traits the employer desires through his or her lying whereas the compulsively honest applicant might get low scores as an ironic penalty for being honest Outcomes like these harm employers and applicants alike The more one delves into the complexities of faking as the authors of the chapters in this volume do so thoroughly and so well the more one will recognize that this seemingly specialized topic ties directly to more general issues in psychology One of these is test validity The bottom line question about any test score faked or not is whether it will predict the behaviors and outcomes that it is designed to predict As Johnson and Hogan point out in their chapter the behavior of someone faking a test is a subset of the behavior of the person in his or her entire life and the critical research question concerns the degree to which and manner in which behavior in one domain generalizes to behavior in other domains This observation illuminates the

fact that the topic of faking is also a key part of understanding the relationship between personality and behavior The central goal of theoretical psychology is to understand why people do the things they do The central goal of applied psychology is to predict what someone will do in the future Both of these goals come together in the study of applicant faking **Journal of the House of Representatives of the United States** United States.
