

ETAP Validation Cases and Comparison Results

ETAP is Validated and Verified (V&V) against field results, real system measurements, published cases, other programs, and field calculations in order to assess its technical accuracy. Prior to validation, to ensure proper use of our software and capabilities, the ETAP Test Group will use test cases in the existing history of execution. In addition, the Test Group reviews all existing test cases, as part of our extensive and comprehensive V&V process.

In accordance with IEEE Quality Assurance Program, all procedures and activities related to the quality of ETAP software are subject to internal and external audits, including customer checks and ISO 9001 third party certification assessment. Test cases are reviewed during the audit process.
