*Riskwork* Michael Power, 2016-09-09 This collection of essays deals with the situated

management of risk in a wide variety of organizational settings aviation mental health railway project management energy toy manufacture financial services chemicals regulation and NGOs Each chapter connects the analysis of risk studies with critical themes in organization studies more generally based on access to and observations of actors in the field The emphasis in these contributions is upon the variety of ways in which organizational actors in combination with a range of material technologies and artefacts such as safety reporting systems risk maps and key risk indicators accomplish and make sense of the normal work of managing risk riskwork In contrast to a preoccupation with disasters and accidents after the event the volume as whole is focused on the situationally specific character of routine risk management work It emerges that this riskwork is highly varied entangled with material artefacts which represent and construct risks and importantly is not confined to formal risk management departments or personnel Each chapter suggests that the distributed nature of this riskwork lives uneasily with formalized risk management protocols and accountability requirements In addition riskwork as an organizational process makes contested issues of identity and values readily visible These back stage back office encounters with risk are revealed as being as much emotional as they are rationally calculative Overall the collection combines constructivist sensibilities about risk objects with a micro sociological orientation to the study of organizations
