Chapter 3 Investigation Worksheet

To complete this worksheet, see the instructions in the textbook (Chapter 3 Investigation).

Table 1. Plate Boundaries of an Unknown Ocean and Continents

This perspective view shows two continents, labeled A and B, separated by an ocean.

- Use the topography to identify possible plate boundaries and to propose whether each boundary is *divergent*, *convergent*, or *transform*.
- Use colored pencils or pens to mark the location and type of each plate boundary on the figure below. Use the following colors: divergent = black; convergent = red; transform = green or blue. For transform boundaries, mark only transform faults (where motion is still occurring), not fracture zones (where it is not).

**Table 2. Predicting the Location of Earthquakes and Volcanoes**

Use your plate boundaries to mark where on the map earthquakes and volcanoes are most likely. On the figure above, do the following:

- Draw circles [○] at any place, on the land or on the ocean floor, where you think earthquakes are likely.
- Draw triangles [▲] in any place, on land or in the ocean, where you think volcanic eruptions are likely. Remember that not all volcanoes form directly on the plate boundary; some form off to one side. Also, a line of islands and seamounts (mountains that are beneath the sea) could mark the track of a hot spot and may not be on a plate boundary.

Table 3. Determining a Safe Place to Live

Determine a relatively safe place to build one city on each continent. Show each location with a plus sign [+] on the map. In the space below, explain your reasons for choosing these as the safest sites.

- Reasons for location of city on Continent A:
