

Marking a Waypoint

A waypoint is any point on the Map Page that you want to remember. You can mark (create) a waypoint at your current location, enter the waypoint, and save it to use as a route (see "Creating Routes").

To mark a waypoint

1. From the Map Page, press **MARK**. The Mark Waypoint page appears.
2. To name the waypoint, use the **ROCKER** key to highlight the "Name" field and press **ENTER**.
3. Enter a name for the waypoint on the keyboard using the **ROCKER** key and the **ENTER** key (see "Entering Data" on the previous page).
4. Highlight "OK" and press **ENTER** to save the waypoint.

Finding Places

Using the Find Page, you can search for waypoints, points of interest, or cities. If you load optional MapSource® Points of Interest data on your GPS 60, you can search for businesses, lodging, restaurants, and more.

To find a waypoint

1. Press the **FIND** key. The Find Page appears, highlighting "Waypoints" and press **ENTER**.
2. Use the **ROCKER** key to scroll down the list and highlight the waypoint you want to find. Press **ENTER** to select the waypoint. The Waypoint Information Page appears.
3. Use the **ROCKER** key to highlight "Map" and press **ENTER** if you want to view the waypoint on the map. Select "Go To" to begin navigation (see "Creating Routes").

Creating and Viewing Tracks

Tracks are like little fingerprints—they show you exactly where you have traveled. Tracks appear as a small dotted line on the Map Page. Your GPS 60 automatically creates tracks as you move and displays the dotted line, called a track log.

To view tracks

1. Press the **MARK** key until you see the Map Page.
2. Walk away from your present location for at least three minutes.
3. Press **W** to begin to see the Map Page until you can see your track log.

On the Find Waypoint Page, use all of the waypoints you have marked. Press **ENTER** to select a waypoint. Then select "Map" to view the waypoint on the Map Page or select "Go To" to begin a route to the waypoint. The track appears on the Map Page as a dotted line from your current location to the waypoint.

Creating Routes

A route gives you straight-line directions from one point to another, or from one point to several others. You can create a simple route by finding a waypoint and selecting "Go To" (see "Finding Places"). You can create more complex routes involving many points with the Route Page.

To create a route

1. Press **MARK** until you see the Map Menu Page. Use the **ROCKER** key to highlight "Routes" and press **ENTER**. Then press **ENTER** again to create a new route.
2. Highlight "Select first Point" and press **ENTER** to add a point to your route. The Find Page appears.
3. Find a waypoint or other point to add to your route (see "Finding Places"). When you have found a point, select "Go To" from the Point Information Page to add the point to your route.
4. Repeat steps 2 and 3 to add more points to your route. When you are finished adding points, highlight "Waypoint" and press **ENTER** to begin using the route.

On the Map, Route, and Map Route Pages, a waypoint is a route. The route appears as a dotted line on the Map Page. To stop navigation, press **ENTER** on the Map Page and select "Stop Navigation".
