Big Data and High Performance Computing L. Grandinetti, G.R. Joubert, M. Kunze, 2015-10-20 Big Data has been much in the news in recent years and the advantages conferred by the collection and analysis of large datasets in fields such as marketing medicine and finance have led to claims that almost any real world problem could be solved if sufficient data were available This is of course a very simplistic view and the usefulness of collecting processing and storing large datasets must always be seen in terms of the communication processing and storage capabilities of the computing platforms available This book presents papers from the International Research Workshop Advanced High Performance Computing Systems held in Cetraro Italy in July 2014 The papers selected for publication here discuss fundamental aspects of the definition of Big Data as well as considerations from practice where complex datasets are collected processed and stored The concepts problems methodologies and solutions presented are of much more general applicability than may be suggested by the particular application areas considered As a result the book will be of interest to all those whose work involves the processing of very large data sets exascale computing and the emerging fields of data science

Sport Development in the United States Peter Smolianov, Dwight Zakus, Joseph Gallo, 2014-09-15 The development of both elite high performance sport and mass participation grassroots level sport are central concerns for governments and sports governing bodies This important new study is the first to closely examine the challenges and opportunities for sports development in the United States a global sporting giant with a unique market driven sporting landscape Presenting an innovative model of integrated sports development the book explores the inter relationship between elite and mass sport across history drawing on comparative international examples from Australia to the former USSR and Eastern bloc countries At the heart of the book is an in depth empirical study of three traditional and emerging sports in the US tennis soccer and rugby that offer important lessons on the development of elite sport methods for increasing participation and the establishment of new sports in new markets No other book has attempted to model sports development in the United States in such depth before Therefore this should be essential reading for all students researchers administrators or policy makers with an interest in sports development sports management sports policy or comparative international sport studies

High-Performance Bolting Technology for Offshore Oil and Natural Gas Operations National Academies of Sciences, Engineering, and

Medicine, National Academy of Engineering, Division on Engineering and Physical Sciences, National Materials and Manufacturing Board, Committee on Connector Reliability for Offshore Oil and Natural Gas Operations, 2018-07-12

Commercially significant amounts of crude oil and natural gas lie under the continental shelf of the United States. Advances in locating deposits and improvements in drilling and recovery technology have made it technically and economically feasible to extract these resources under harsh conditions. But extracting these offshore petroleum resources involves the possibility, however remote, of oil spills with resulting damage to the ocean and the coastline ecosystems and risks to life and limb of those performing the extraction. The environmental consequences of an oil spill can be more severe underwater than on land because sea currents can quickly disperse the oil over a large area and thus cleanup can be problematic. Bolted connections are an integral feature of deep water well operations. High Performance Bolting Technology for Offshore Oil and Natural Gas Operations summarizes strategies for improving the reliability of fasteners used in offshore oil exploration equipment as well as best practices from other industrial sectors. It focuses on critical bolting bolts, studs, nuts, and fasteners used on critical connections. AI 2020: Advances in Artificial Intelligence Marcus Gallagher, Nour Moustafa, Erandi Lakshika, 2020-11-27

This book constitutes the proceedings of the 33rd Australasian Joint Conference on Artificial Intelligence AI 2020 held in Canberra, ACT, Australia, in November 2020. The 36 full papers presented in this volume were carefully reviewed and selected from 57 submissions. The papers were organized in topical sections named: applications, evolutionary computation, fairness and ethics, games and swarms, and machine learning. The conference was held virtually due to the COVID-19 pandemic. Active Learning: Theoretical Perspectives, Empirical Studies and Design Profiles Robert Cassidy, Elizabeth S. Charles, James D. Slotta, Nathaniel Lasry, 2019-07-11. This book represents the emerging efforts of a growing international network of researchers and practitioners to promote the development and uptake of evidence-based pedagogies in higher education at something of a level approaching large-scale impact. By offering a communication venue that attracts and enhances much needed partnerships among practitioners and researchers in pedagogical innovation, we aim to change the conversation and focus on how we work and learn together, i.e., extending the implementation and knowledge of co-design methods. In this first edition of our Research Topic on Active Learning, we highlight two of the three types of publications we wish to promote. First are studies aimed at understanding the pedagogical designs developed by practitioners in their own practices by bringing to bear the theoretical lenses developed and tested in the education research community. These types of studies constitute the practice pull that we see as a necessary counterbalance to knowledge push in a more productive pedagogical innovation ecosystem based on research-practitioner partnerships. Second are studies empirically examining the implementations of evidence-based designs in naturalistic settings and under naturalistic conditions. Interestingly, the teams conducting these studies are already exemplars of partnerships between researchers and practitioners who are uniquely positioned as in-betweeners straddling the two worlds. As a result, these publications represent both the rigours of research and the pragmatism

of reflective practice In forthcoming editions we will add to this collection a third type of publication design profiles These will present practitioner developed pedagogical designs at varying levels of abstraction to be held to scrutiny amongst practitioners instructional designers and researchers alike We hope by bringing these types of studies together in an open access format that we may contribute to the development of new forms of practitioner researcher interactions that promote co design in pedagogical innovation
