Handbook of Research on Schools, Schooling and Human Development Judith L. Meece, Jacquelynne S. Eccles, 2010-06-10 Children spend more time in school than in any social institution outside the home And schools probably exert more influence on children's development and life chances than any environment beyond the home and neighbourhood The purpose of this book is to document some important ways schools influence children's development and to describe various models and methods for studying schooling effects Key features include Comprehensive Coverage this is the first book to provide a comprehensive review of what is known about schools as a context for human development Topical coverage ranges from theoretical foundations to investigative methodologies and from classroom level influences such as teacher student relations to broader influences such as school organization and educational policies Cross Disciplinary this volume brings together the divergent perspectives methods and findings of scholars from a variety of disciplines among them educational psychology developmental psychology school psychology social psychology psychiatry sociology and educational policy Chapter

Structure to ensure continuity chapter authors describe 1 how schooling influences are conceptualized 2 identify their theoretical and methodological approaches 3 discuss the strengths and weaknesses of existing research and 4 highlight implications for future research practice and policy Methodologies chapters included in the text feature various methodologies including longitudinal studies hierarchical linear models experimental and quasi experimental designs and mixed methods

Children, Schools, And Inequality Doris R Entwisle, 2018-03-05 Educational sociologists have paid relatively little attention to children in middle childhood ages 6 to 12 whereas developmental psychologists have emphasized factors internal to the child much more than the social contexts in explaining children s development Children Schools and Inequality redresses that imbalance It examines elementary school outcomes e g test scores grades retention rates in light of the socioeconomic variation in schools and neighborhoods the organizational patterns across elementary schools and the ways in which family structure intersects with children s school performance Adding data from the Baltimore Beginning School Study to information culled from the fields of sociology child development and education this book suggests why the gap between the school achievement of poor children and those who are better off has been so difficult to close Doris Entwistle Karl Alexander and Linda Olson show why the first grade transition how children negotiate entry into full time schooling is a crucial period They also show that events over that time have repercussions that echo throughout children s entire school careers Currently the only study of this life transition to cover a comprehensive sample and to suggest straightforward remedies for urban schools Children Schools and Inequality can inform educators practitioners and policymakers as well as researchers in the sociology of education and child development

High-Stakes Testing R. Murray Thomas, 2005-03-23 The federal government s No Child Left Behind Act has thrust high stakes testing its goals methods and consequences into the educational limelight The four fold purpose of this book is to describe the nature of high stakes testing identify types of collateral damage that have attended the testing programs analyze methods different groups of people have

chosen for coping with the damage and suggest lessons to be learned from the high stakes testing experience. The six groups of people whose coping strategies are inspected include politicians and their staffs, educational administrators and their staffs, parents and the public, test makers and test administrators, teachers and students. Importantly, the author avoids aligning himself with the test-bashing rhetoric of those who oppose high stakes testing, especially the No Child Left Behind Act. Key features of this outstanding new book include illustrative cases. The book offers more than 350 cases of collateral damage from high stakes testing and people's coping strategies as reported in newspapers over the 2002-2004 period. Background perspectives: Part I examines the influence of high stakes testing on 1) what schools teach, 2) how student progress is evaluated, 3) how achievement standards are set, and 4) how test results are used. Participant responses: Part II, which is the heart of the book, devotes a separate chapter to the coping strategies of each of the major participants in the high stakes testing movement: politicians and their staffs, educational administrators and their staffs, parents and the public, test makers and test givers, teachers and students. Summary chapter: The last chapter, Lessons to Learn, offers suggestions for minimizing collateral damage by adopting alternative approaches not used in the creation of our current high stakes testing programs, particularly the federal government's No Child Left Behind Act. This book is appropriate for any of the following audiences: students taking evaluation or administration courses in schools of education, inservice administrators and teachers, policy makers, and those members of the general public who are concerned about the fate of schooling in America. **The Dimensions of**

Time and the Challenge of School Reform Patricia C. Gandara, 2000-01-01. Annotation: As the education reform movement matures into its second decade, it is clear that many promising efforts have fallen short in their attempts to create real school change. One reason for this is that the process of school reform is much more complex than most reformers realized or were willing to acknowledge. *The Dimensions of Time and the Challenge of School Reform* points to another problem: the problem of time and its role in both the success and failure of school reform efforts. The importance of understanding the role that time plays in both learning and instruction, and finding ways to provide time for teachers grappling with change and students learning to accommodate a new language and culture, are important themes in this book. This book is directed to policymakers and practitioners as well as to academics, in that it combines theory with the real-world experiences of many who have been active in the school reform movement and who have learned through trial and error how to think about time in innovative ways.
