Grading for Impact Tom Hierck, Garth Larson, 2018-04-04 Aim for a target based grading system and create stronger learning opportunities Do you wish there was more clarity when it comes to measuring student progress and learning What if there was a way to utilize grading and assessment to focus on learning rather than performance and the process rather than the product As grading assessment and reporting continue to be relevant topics of discussion this book helps you create a functional plan to elevate and advance standards based grading practices Teachers and administrators will learn how to assess grade and report against specific learning targets rather than standards as a whole to make skill acquisition the highest priority Grounded in application to provide focus and clarity this book features Real case studies of schools that have incorporated target based assessment feedback grading and reporting Practical examples to guide implementation Questions checklists illustrations and audits of practice to showcase the work in action An accessible format and layout that support both immediate implementation and long term goals Despite being a topic that generates emotion and resistance to change target based assessment builds the foundation for a learner centered system that provides clear expectations and feedback for teachers students and parents *Grading for Impact* is a simple and straightforward guide to rethinking grading based on mastery of specific skills and concepts rather than broadly written standards Real world examples of teachers struggling with and answering the old questions are included How do we grade fairly and accurately and How do we use grades as an instructional strategy Joseph Staub High School Teacher Downtown Magnets High School CA Most stakeholders agree that report cards aren't enough to show what our students are learning in school but changing the traditional grading system is a task that requires careful planning and challenging discussions *Grading for Impact* shows educators how to start and plan the discussions that will result in genuine learning experiences for students Ernie Rambo Virtual Learning Community Coordinator Nevada National Board Professional Learning Institute

Advancing Formative Assessment in Every Classroom Connie M. Moss, Susan M. Brookhart, 2010-10-04 Formative assessment is one of the best ways to increase student learning and enhance teacher quality But effective formative assessment is not part of most classrooms largely because teachers misunderstand what it is and don't have the necessary skills to implement it In this practical guide for school leaders authors Connie M Moss and Susan M Brookhart define formative assessment as an active continual process in which teachers and students work together every day every minute to gather evidence of learning always keeping in mind three guiding questions Where am I going Where am I now What strategy or strategies can help me get to where I need to go Chapters focus on the six elements of formative assessment 1 sharing learning targets and criteria for success 2 feedback that feeds forward 3 student goal setting 4 student self assessment 5 strategic teacher questioning

and 6 engaging students in asking effective questions Using specific examples based on their extensive work with teachers the authors provide Strategic talking points and conversation starters to address common misconceptions about formative assessment Practical classroom strategies to share with teachers Ways to model the elements of formative assessment in conversations with teachers about their professional learning What if scenarios and advice for how to deal with them and Questions for reflection to gauge understanding and progress As Moss and Brookhart emphasize the goal is not to do formative assessment but to embrace a major cultural change that moves away from teacher led instruction to a partnership of intentional inquiry between student and teacher with better teaching and learning as the outcome

Assessment-Centered Teaching Kathryn DiRanna, 2008-03-07 Valuable for practitioners who wish to improve their teaching and their students learning and for researchers concerned with putting ideas of formative assessment into teaching practice Richard J Shavelson Margaret Jack Professor of Education Stanford University Drawing from conceptual principles and empirical findings that establish the crucial role of ongoing formative assessment the authors describe a professional development framework and program that prepares teachers to adjust their teaching to student thinking in the moment and to refine assessments to better reveal students understandings throughout instruction Joan I Heller Director Heller Research Associates A reflective process for integrating assessment and instruction Because assessment and instruction are two sides of the same coin it is critical for teachers to not only assess what students understand but also use that information to adjust their teaching Assessment Centered Teaching ACT is a unique practice that allows teachers to gather information during instruction to uncover learning gaps and guide students toward deeper understandings of complex ideas Suitable for all grade levels this resource describes how reflective practitioners can use the ACT portfolio to reflect on modify and improve their curriculum and instruction The forms included on the CD ROM guide teachers through the process This book encourages educators to Reflect on their own practice Systematically examine student progress toward identified learning goals over time Monitor instruction and assessment for continuous improvement Assessment Centered Teaching helps teachers professional developers and school teams establish quality instructional goals and implement ongoing formative assessment to promote student success
