Guide To Making A Skiller:

Dreaming with the Ancestors Shirley Boteler Mock, 2012-10-09 Indian freedmen and their descendants have garnered much public and scholarly attention but women's roles have largely been absent from that discussion. Now a scholar who gained an insider's perspective into the Black Seminole community in Texas and Mexico offers a rare and vivid picture of these women and their contributions. In *Dreaming with the Ancestors* Shirley Boteler Mock explores the role that Black Seminole women have played in shaping and perpetuating a culture born of African roots and shaped by southeastern Native American and Mexican influences. Mock reveals a unique maroon culture forged from an eclectic mixture of religious beliefs and social practices. At its core is an amalgam of African-derived traditions kept alive by women. The author interweaves documentary research with extensive interviews she conducted with leading Black Seminole women to uncover their remarkable history. She tells how these women nourished their families and held fast to their Afro-Seminole language even as they fled slavery, endured relocation, and eventually sought new lives in new lands. Of key importance were the warrior women, keepers of dreams and visions that bring to life age-old African customs. Featuring more than thirty illustrations and maps, including historic photographs never before published, *Dreaming with the Ancestors* combines scholarly analysis with human interest to open a new window on both African American and American Indian history and culture. Research in Education, 1972 **Globalising the Climate** Stefan Aykut, Jean Foyer, Edouard Morena, 2017-03-03 Frequently presented as a historic last chance to set the world on a course to prevent catastrophic climate change, the 21st Conference of the Parties to the Climate Convention COP21 was a global summit of exceptional proportions. Bringing together negotiators, scientists, journalists, and representatives of global civil society, it also constituted a privileged vantage point for the study of global environmental governance in the making. This volume offers readers an original account of the current state of play in the field of global climate governance. Building upon a collaborative research project on COP21 carried out by a multidisciplinary team of twenty academics with recognised experience in the field of environmental governance, the book takes COP21 as an entry point to analyse ongoing transformations of global climate politics and to scrutinise the impact of climate change on global debates more generally. The book has three key objectives: To analyse global climate governance through a combination of long-term analysis and on-site observation; To identify and analyse the key spaces of participation in the global climate debate; To examine the climatisation of a series of crosscutting themes including development, energy, security, and migration. This book will be of great interest to students, scholars, and policymakers of climate politics and governance, international relations, and environmental studies. **Resources in Education**, 1972 **ECIE2012-7th**
