From the experimental point of view we encourage both behavioural and neuroimaging contributions e.g. fMRI, EEG, MEG, DTI and TMS. Despite the main emphasis on face perception, memory and identification, we will also consider original works that focus on other aspects of face processing such as expression recognition, attractiveness judgments and face imagery. In addition, animal investigations and experimental manipulations that alter face recognition abilities in typical human subjects e.g. hypnosis are also welcome. Overall, we are proposing a Research Topic that looks at face processing using different perspectives and welcome contributions from different domains such as psychology, neurology, neuroscience, cognitive science and philosophy. The current Research Topic evolved over the desire to acknowledge the relatively recent loss of three giants in the field: Drs Shlomo Bentin, Truett Allison and Andy Calder. We dedicate this Research Topic to them and their pioneering studies.

The Routledge Companion to Improvisation in Organizations Miguel Pina e Cunha, Dusya Vera, António Cunha Meneses Abrantes, Anne Miner, 2023-09-20. This innovative volume provides a comprehensive overview of improvisation as a pervasive organizational process essential in ever-changing business environments. Exploring theories of organizational action as well as contemporary challenges, it highlights improvisation's rich potential in theory building and practice. The value and relevance of improvisational capabilities and processes in organizations are more apparent than ever: the global pandemic has forced organizations to reinvent themselves and to adapt to dramatic change on a massive scale. This surge in improvised activity starkly illustrates how the capability to improvise is key to organizational resilience: organizations that are able to improvise effectively are better prepared to bounce back and even thrive. From the latest thinking on improvisation in organizations to future avenues for research, this volume demonstrates the rich potential for both theory building and practice and provides a valuable resource for researchers and advanced students in organizational strategy, entrepreneurship, product development, information systems, disaster management and HRM.

Official Gazette of the United States Patent and Trademark Office, 1993. [Data Science Applied to Sustainability Analysis](#) Jennifer Dunn, Prasanna Balaprakash, 2021-05-11. *Data Science Applied to Sustainability Analysis* focuses on the methodological considerations associated with applying this tool in analysis techniques such as lifecycle assessment and materials flow analysis. As sustainability analysts need examples of applications of big data techniques that are defensible and practical in sustainability analyses and that yield actionable results that can inform policy development, corporate supply chain management strategy or non-governmental organization positions, this book helps answer underlying questions. In addition, it addresses the need of data science experts looking for routes to apply their skills and knowledge to domain areas. Presents data sources that are available for application in sustainability analyses such as market information, environmental monitoring data, social media data and satellite imagery. Includes considerations sustainability analysts must evaluate when applying big data. Features case studies illustrating the application of data science in sustainability analyses.
