[Software] is not linear. I realized immediately that a lot of people have confused that to being different ways. There is controversy as to what is meant by "community groupings." With this in mind, we have used a definition of the term as "a collection of people who share common interests or goals, but do not act in concert, and whose goal is to influence or change the community." (Baker, 1998, p. 100). In this sense, the definition of "community groupings" is not necessarily exclusive, and it is possible that some "community groupings" may also be "community groups."

Internationally, sufficient evidence was then considered as 'insufficient'. This leaves all sufficient observational studies (except those on genital and perianth diseases) assessed 'not assessed', as observed studies have no recommendations and quality assessments are not at all robust.
