

IMPORTANT NOTES

If the engine is to be run for a short time without battery (using a slave battery for starting), do not, under any circumstances, interrupt this circuit by switching off the main switch before stopping the engine by means of the fuel pump shut-off cable. An additional load (lights) must also be switched on. Do not run engine above 1000 rpm. Insulate battery end of disconnected starter cable properly to avoid damage to alternator and regulator.

Do NOT connect ground strap of slave battery to frame on tractors equipped with an SG2 cab or RG2 roll guard.

Observe proper polarity when connecting batteries and chargers. Improperly connected batteries ("+" and "-" —) result in immediate destruction of rectifier diodes.
