

Emotional Experience

Guilty Look Evidence

Ostojic et al., paper

o Method

The experimenter either removed the food item or let the dogs eat it . Upon the owner's return, the food item was either absent or it was replaced by the experimenter and thus clearly visible to the owners and the dogs. Wonders were instructed to behave in a neutral manner such that we could investigate whether either or both of these cues might trigger the dog's guilty look behavior.

The looks were assessed through owners' statements about whether or not they thought that their dog had eaten the forbidden food item.

The experimenters did not tell the dog owners the true purpose of the experiment in order to get their responses on telling the dog's looks. The experimenters manipulated whether the food is replaced or not after the dog eats it or not. There are four groups of dogs as a result, 1. Not Eaten & Not Replaced 2. Not Eaten & Replaced 3. Eaten & Not Replaced 4. Eaten & Replaced. The response of each group's owners of whether their dog's had eaten the forbidden food item is being recorded.

Fig. 1. Proportion of dogs for which owners reported that they had eaten the forbidden food item. The Y-axis indicates the proportion of dogs for which owners reported that they had eaten the forbidden food item. The X-axis indicates the condition (Eaten or Not Eaten). The light gray bars represent the proportion of dogs for which owners reported that they had eaten the forbidden food item when the food was not replaced. The dark gray bars represent the proportion of dogs for which owners reported that they had eaten the forbidden food item when the food was replaced. Error bars represent standard error.

o Results

Converging evidence 3: no difference in behaviors associated with guilty look. Much behaviors were seen in trials when wonders scolded their dogs. The so -called guilty look is that it is a response to owner cues, rather than that it shows an appreciation of a misdeed.

Whether the dog gives the guilty look was not influenced by whether they had eaten the food or not nor is it influenced by if the food is replaced or not. In the absence of scolding, the two cues both failed to trigger the guilty look from dogs.
