The Lean Approach to Digital Transformation Yves Caseau, 2022-05-01 The Lean Approach to Digital Transformation From Customer to Code and From Code to Customer is organized into three parts that expose and develop the three capabilities that are essential for a successful digital transformation

- 1 Understanding how to co create digital services with users whether they are customers or future customers This ability combines observation dialogue and iterative experimentation The approach proposed in this book is based on the Lean Startup approach according to an extended vision that combines Design Thinking and Growth Hacking Companies must become truly customer centric from observation and listening to co development The revolution of the digital age of the 21st century is that customer orientation is more imperative the era of abundance usages rate of change complexity of experiences and shift of power towards communities are easier using digital tools and digital communities
- 2 Developing an information system IS that is the backbone of the digital transformation called exponential information system to designate an open IS in particular on its borders capable of interfacing and combining with external services positioned as a player in software ecosystems and built for processing scalable and dynamic data flows The exponential information system is constantly changing and it continuously absorbs the best of information processing technology such as Artificial Intelligence and Machine Learning
- 3 Building software micro factories that produce service platforms which are called Lean software factories This software factory concept covers the integration of agile methods tooling and continuous integration and deployment practices a customer oriented product approach and a platform approach based on modularity as well as API based architecture and openness to external stakeholders This software micro factory is the foundation that continuously produces and provides constantly evolving services

These three capabilities are not unique or specific to this book they are linked to other concepts such as agile methods product development according to lean principles software production approaches such as CICD continuous integration and deployment or DevOps This book weaves a common frame of reference for all these approaches to derive more value from the digital transformation and to facilitate its implementation The title of the book refers to the lean approach to digital transformation because the two underlying frameworks Lean Startup and Lean

Software Factory are directly inspired by Lean in the sense of the Toyota Way The Lean approach is present from the beginning to the end of this book it provides the framework for customer orientation and the love of a job well done which are the conditions for the success of a digital transformation

Design, User Experience, and Usability: User Experience Design for Diverse Interaction Platforms and Environments Aaron Marcus, 2014-06-11 The four volume set LNCS 8517 8518 8519 and 8520 constitutes the proceedings of the Third International Conference on Design User Experience and Usability DUXU 2014 held as part of the 16th International Conference on Human Computer Interaction HCII 2014 held in Heraklion Crete Greece in June 2014 jointly with 13 other thematically similar conferences The total of 1476 papers and 220 posters presented at the HCII 2014 conferences were carefully reviewed and selected from 4766 submissions These papers address the latest research and development efforts and highlight the human aspects of design and use of computing systems The papers accepted for presentation thoroughly cover the entire field of Human Computer Interaction addressing major advances in knowledge and effective use of computers in a variety of application areas The total of 256 contributions included in the DUXU proceedings were carefully reviewed and selected for inclusion in this four volume set The 76 papers included in this volume are organized in topical sections on design for the web design for the mobile experience design of visual information design for novel interaction techniques and realities games and gamification
