What We Need to Face in American Education Gary Kroesch,Bill Madigan,2011-03-23 For the first time in human history we are living in an age where the youth of our nation know more about societys cutting edge tools than the adults charged with passing societys technical and cultural knowledge on to them Most of our young people have far more facility with computer and telecommunications technology than our teaching corps and generally that gap only widens as students travel from elementary school all the way to university and beyond Its a brave new and often dangerous world that todays youth must learn to navigate Now more than ever they need educators to step up and teach them how to be critical thinkers able to discriminate between the true and the merely seductive to see beyond the glossy veneer on harmful websites harmful ideas and sadly harmful people in both the real and cyber worlds We need to spend a little less time teaching students how to take standardized tests and a lot more time developing their critical faculties so they will be able to solve lifes problems profit from challenging situations and understand the increasingly complex world they must ken at an earlier and earlier age
