## **Environmental Engineering By N N Basak:**

*Environmental Engineering* N. N. Basak, 2003      *Energy and Sustainability V* H.H. Al-Kayiem, C.A. Brebbia, S.S. Zubir, 2014-12-16 *Energy and Sustainability V* is the proceedings of the 5th International Conference on Energy and Sustainability held by the Wessex Institute of Technology. The modern world is highly dependent on the exploitation of fossil fuels. More recently, resources depletion and severe environmental effects deriving from the continuous use of these fuels has resulted in an increasing amount of interest in renewable energy resources and the search for sustainable energy policies. The changes required to progress from an economy mainly based on hydrocarbons to one taking advantage of sustainable energy resources are massive and require considerable scientific research as well as engineering systems. The effect also involves collaboration between different disciplines in order to arrive at optimum solutions including buildings energy networks, convenience systems, new energy storage solutions, waste to energy technologies and many others. This book covers topics related to sustainability in energy and power production, storage, distribution and management. These include Smart grids, Smart metering, Green ICT, Green buildings, Energy storage, Renewable energy resources, Plug in Hybrid Vehicles, PHEV, Biofuels, solid liquid gas, Waste to energy, CO<sub>2</sub> capturing and management, Energy and transportation, Environmental risk, Energy policies, Greener power plant technologies, Hydrogen recovery techniques, Sustainable energy production.

Environment and Sustainable Development Perspectives and Issues 1. Dr. Rohit Kumar Bargah 2. Dr. Praveen Kumar Sahu 3. Mr. Bodh Ram Chaohan, 2024-07-13. The title of the book *Environment and Sustainable Development Perspectives and Issues* itself represents that the book is having topics related to current environmental problems and its possible solutions. This edition of book focuses on the issues related to sustainable use and management of natural resources and e waste management. Several methods to handle a wide spectrum of environmental issues are taken into account in numerous chapters. Climate change is one of the greatest challenges of the 21st century. Climate is changing across our planet largely as a result of human activities. Some of the book chapters also provide a holistic coverage of the climate change policies and role of India. Climate change and various infectious diseases proposes a comprehensive set of solutions to resolve various issues related to environment. The impacts of climate change are becoming increasingly severe, natural resources are being depleted at an alarming rate and the gap between the rich and poor is widening. The need for sustainable development has never been more pressing than present. Therefore this book makes a valuable contribution to the ongoing conversation challenges and opportunities around many critical issues. The chapter in the book explore a wide range of topics related to sustainability including the role of renewable energy, the need for sustainable agriculture, the importance of community engagement and the impact of climate change. The authors come from diverse academic and professional backgrounds and they are expert at their disciplines. The authors come from diverse academic and professional background and their insight provide a valuable contribution to the ongoing conservation around environmental protection and sustainable development.

The editors of this book are to be commended for bringing together such a diverse group of contributors and for presenting a balanced and nuanced exploration of these complex issues      **Public Health Engineering** Rinku Kumar,2025-06-01

limiting environmental impact this book provides readers with foundational understanding of growing and utilizing Cassava

Cassava (*Manihot* spp.) is a staple crop in tropical and subtropical regions of the world with diverse food and non food value. It is a principal energy source but may be fortified to provide improved nutritional status for consumers as well as for the production of value added products. With the growing human population there is a need to increase global production and efficiency in trade, diversify and ensure safe consumption, maximize utilization of all cassava processing wastes and add value to the cassava production chain through sustainable practices. Presented in three parts, the first addresses cassava diversity and distribution, sustainable production and cultivation practices and root processing innovations of the crop. Cassava trade policies and economic value chains, food safety and use of cassava and agro industrial cassava products are addressed in the second part. The third part focuses on bioeconomy aspects, cassava waste quality assessment, toxicology, sanitary practices, environmental risk assessment as well as sustainable management strategies for cassava waste using biotechnological and industrial advances. Addressing the need for a unified and standardized approach for the trade management and utilization of cassava genetic resources, finished products and cassava processing wastes, the book also explores policy and governance structure for addressing environmental and economic issues emanating from their use. In the lens of globalization, climate change adaptation and mitigation and sustainable development, the contents of this book will promote the adoption of novel and advanced practices in cassava cultivation and production, harvest, use and waste recovery or reduction and contribute to global cooling efforts. Presents best practices and ideas from around the world including technological advances for Cassava production and use. Focuses on sustainability throughout the lifecycle. Provides insights translatable to other tuber crops for further enhanced sustainable food security.
