

Headlight

SAFETY FIRST: Protective gloves and eyewear are recommended at this point.

Note: 2013 ~ 2015 models use a traditional Halogen H4 60/55W bulb and a 5W Stanley type position bulb. From 2016 onwards a non serviceable LED was fitted, in this case the whole assembly should be replaced.

Bulb Replacement (2013 ~ 2015)

Do not touch halogen bulbs with your bare hand. The oils on your hand can cause the failure of the bulb when it gets hot. Clean the bulb with a lint free towel and alcohol if you touch it bare handed.

If you have any question whether a bulb is good or not, check across the filament wires at the bulb socket with a multi-meter set to the resistance scale (ohm x1). If there is continuity across the filament the bulb is good. No continuity indicates a bad bulb.

Remove the bulb maintenance lid. Depress the center pin on the two trip clips (circled). Pull the lid downwards and out to release the four retaining tabs.

Remove the bulb maintenance lid.

The headlight bulbs are removed from the back of the headlight housing assembly. To do so remove the large bulb cap by turning it counterclockwise (check the condition of the O-ring gasket once the cap is removed and replace, as necessary). Unplug the black 2P headlight connector, then unhook the retainer and remove the headlight bulb from the housing.

During installation align the bulb tab properly with the groove, then hook the retainer and reconnect the wiring. Position the bulb cap (with O-ring) and install it by aligning it and turning it clockwise to seat. Once positioned make sure the triangular mark on the cap aligns with the mark on the housing.

Position Light Service

In addition to the headlight on the CB500X there is also a position light in the upper cowl and headlight housing assembly that can be replaced as necessary.
