Genesis Pro Features

Bow

The main frame sections on your Genesis Pro bow is machined 6061 T6 aluminum. This material is engineered to provide the Genesis Pro with optimal balance while being built extremely durable and very lightweight.

Larger controlled clearance area: An increased range of cam-to-cam adjustment accommodates many modern cams and allows for increased bow string extension. Since the Genesis Pro does not include a rest, choose a rest that suits your needs and shooting style.

Idle Wheel

The idle wheel is located at the upper limb of the bow. The main function of the idle wheel is to transfer draw energy from the bow limbs back through the string to the arrow in a smooth and consistent way.

Drawings in the idle wheel are made of a very low friction synthetic material which reduces friction.

Limbs and Limb Bolts

The limbs on your Genesis Pro bow are adjustable to suit you or the bow. They store the potential energy you put into the bow until the string is released. At the moment of release, the stored potential energy is transferred into string to motion, and the arrow is propelled toward the target. The limb bolts adjust the draw to fit your bow and are also used to adjust the draw length on your bow. Using a 1/4 inch wrench, the limb bolts can be turned in a counter-clockwise direction to decrease the draw length of the bow to a minimum of 15 lbs. Turning the limb bolts clockwise will increase the bow to its maximum of 35 lbs. One full turn equals approximately 1/4 lbs. of draw weight. The limb bolts on each limb should always be turned the same number of turns when adjusting bow draw weight.

With the Genesis Pro you can fit virtually anyone with an adjustable draw stop that provides the power with a "hard wall" which allows shooting with a mechanical release and more.

Genesis Pro Bowstring System

The Genesis Pro bow features single cam design. The replaceable cam allows the bow to maintain its set percentage throughout the draw cycle. The replaceable cam sits on the cam cables and guides the bow string. When the bowstring is released, the cam creates a "hard wall" which results in a better arrow while increasing bow speed.

Draw Stop

Customizing the Genesis Pro to your draw length is easy! The draw stop on the Genesis Pro is adjusted with an Allen wrench. Simply turn the draw stop counter-clockwise until it is completely removed. Draw it to the desired draw stop position, tighten with security in place. Use the larger diameter draw stop to adjust to 12" (approx.) increments and the smaller diameter draw stop to adjust to 1" (approx.) increments.

Tip

The double indexing pin on your Genesis bow is actually designed to fit the contours of your hand, providing both comfort and consistency.

Drawstring

We equip each Genesis Pro bow with a high-strength, double braiding bow string made of the best materials. This braiding provides superior performance, ensuring that the maximum amount of the bow's stored energy is transferred to the arrow.

Power Cable and Cable Guard

The power cable is the second component of the bowstring assembly. It is anchored at the pin on the upper limb and wraps around the take-up hook on the cam which is mounted on the lower limb.

The cable guard is the metal rod which supports the sliding cable eye and helps the cable slip off to one side and out of the tight part of the arrow.

Notching Point

You or your local pro shop must properly notch a string rest to ensure proper arrow position on the string for repeatable accuracy.

WARNING: Please confirm that arrow rest are in proper length and offset to your bow's draw weight and draw length. Test and follow your arrow manufacturer's recommendations.
