thinking and it is generally assumed that others will get the gist and fully understand the meaning Further to these numbers of English speakers it is estimated that some 600 700 million people across the globe speak some English as a foreign language So in short that is well over a billion people in the world today can communicate in some sort of English language These are figures from over 10 years ago so the number might well have increased From this it is reasonable to assume that approximately 1 5 billion people across the world are capable of communicating in English This Book helps people to understand British Catchphrases A must have for people who have English as a second language ObamaCare Survival Guide Nick J.
