Underground Blake Atwood, 2021-09-28 How Iranians forged a vibrant informal video distribution infrastructure when their government banned all home video technology in 1983 In 1983 the Iranian government banned the personal use of home video technology In *Underground* Blake Atwood recounts how in response to the ban technology enthusiasts cinephiles entrepreneurs and everyday citizens forged an illegal but complex underground system for video distribution Atwood draws on archival sources including trade publications newspapers memoirs films and laws but at the heart of the book lies a corpus of oral history interviews conducted with participants in the underground He argues that videocassettes helped to institutionalize the broader underground within the Islamic Republic As Atwood shows the videocassette underground reveals a great deal about how people construct vibrant cultures beneath repressive institutions It was not just that Iranians gained access to banned movies but rather that they established routes acquired technical knowledge broke the law and created rituals by passing and trading plastic videocassettes As material objects the videocassettes were a means of negotiating the power of the state and the agency of its citizens By the time the Ministry of Culture and Islamic Guidance lifted the ban in 1994 millions of videocassettes were circulating efficiently and widely throughout the country The very presence of a video underground signaled the failure of state policy to regulate media

Embedded in the informal infrastructure even in the videocassettes themselves was the triumph of everyday people over the state
