*DIY Utopia* Amber Day, 2016-12-22 At first glance contemporary popular culture filled with bleak images of the future seems to have given up on the possibility of positive collective change Below the surface however alternative culture is rife with artist led projects activist movements and subcultural communities of interest that seek to spark the collective imagination and to encourage hunger for alternatives More playfully self-conscious than past utopian movements today's are often whimsical or ironic but are still entirely earnest Artists invite us to re-author city maps or archive individual ideas for the future while maker collectives urge us to rethink our relationship to consumer goods All seem to have grown out of a similar do it yourself ethos and alternative culture One of the central conflicts informing these case studies is that while it remains immensely difficult to envision anything outside of the current system of consumer capitalism there is nevertheless a powerful desire to take it

apart in piecemeal ways We see the longing for new social and political narratives new forms of communion and sociability and new imaginings of the possible longings that are currently unmet by mainstream culture but that are taking expression in myriad ways at the local level Taken as a whole this collection examines what our grand ideals and playful daydreams tell us about ourselves *Smart Trends in Computing and Communications* Tomonobu Senjyu, Chakchai So-In, Amit Joshi, 2023-06-14

Patrick Heidkamp, John

Morrissey, 2018-09-28 Coastal zones represent a frontline in the battle for sustainability as coastal communities face unprecedented economic challenges Coastal ecosystems are subject to overuse loss of resilience and increased vulnerability This book aims to interrogate the multi scalar complexities in creating a more sustainable coastal zone Sustainability transitions are geographical processes which happen in situated particular places However much contemporary discussion of transition is either aspatial or based on implicit assumptions about spatial homogeneity This book addresses these limitations

through an examination of socio technological transitions with an explicitly spatial focus in the context of the coastal zone The book begins by focusing on theoretical understandings of transition processes specific to the coastal zone and includes detailed empirical case studies The second half of the book appraises governance initiatives in coastal zones and their efficacy The authors conclude with an implicit theme of social and environmental justice in coastal sustainability transitions Research will be of interest to practitioners academics and decision makers active in the sphere of coastal sustainability The multi disciplinary nature encourages accessibility for individuals working in the fields of Economic Geography Regional Development Public Policy and Planning Environmental Studies Social Geography and Sociology
