Dunlap's book is self-described as a manual of firearms design construction alteration and remodeling for amateur and professional gunsmiths and users of modern firearms What makes Dunlap's book important is its specificity For example instead of merely bringing up the need for a bench grinder he cites why a 14 or 13 horsepower double shaft model turning at 1750 rpm with a wire brush wheel on one side and a medium coarse wheel on the other is the best choice He supports his recommendation by explaining why you'll find wider use for a medium coarse than a finer stone His chapter entitled Helpful Gunsmith Knowledge is absolutely crammed with bits of information and includes tips that he evidently could find no other place for in his book In the midst of a general discussion on disassembly for instance Dunlap digresses to describe in detail a L-shaped tool he made to simplify reassembly of an L.C. Smith double and how to use it All in all Dunlap covers soldering and brazing welding heat treatment of metals making and fitting sights and accessories making fitting and heat treatment of parts cartridge information useful to gunsmiths rifle barrels chamber and barrel work rifle action work pistol and revolver work shotgun work twenty-two rim-fire arms browning blueing and blacking of metal fitting commercial metallic sights mounting telescopic sights wood for gun stocks design of gun stocks stock making checkering stock repair and alteration stock finishing styling the custom rifle custom metal work ornamentation of wood and metal target rifles the Garand rifle testing facilities and apparatus synthetic bedding cartridge and chamber drawings and data sheets A classic work profusely illustrated
