1. Check the fuel level. Starting with a full tank will help to eliminate air intake venting possibilities for starting.
2. Check the engine oil level on page 16. Starting the engine with a low oil level can cause engine damage.
3. Check the air filter element on page 16. If dirty, or the element will restrict air flow to the carburetor, causing engine performance.
4. Check the carburetor according to the steps below.

Testing the hypotheses presented with the technology scenario for the impact of two moderators and considering eight possible combinations requires several more studies.
